CO5	2	2	3	1	3	2			
Course Contents / Syllabus									
Module 1		Introduction to Management						8 hours	
Management-Meaning, Nature & Significance - Combination of Art & Science, Management as a Profession, Management Vs Administration, Levels of Management - Elements of managerial processes- Styles & Roles of Managers in Organizations. Contributions of Taylor and Fayol, Human Relations & Behavioral Schools-Hawthorne Studies.									
Module 2		Introduction to Planning						8 hours	
Nature, Process of Planning, Planning and Environmental Uncertainties, Types of Planning. Advantages and Limitations of Planning-Decision Making-Stages in Decision Making. Case studies									
Module 3		Organizing & Organization Structure						8 hours	
Nature & Significance of Organization, Authority & Responsibility Relationships-Span of Control, Process of Delegations- Barriers to Delegation, Centralization & Decentralization. Concept of Line & Staff-Overcoming Line-staff conflict, Committees, Coordination, Organization Structures, Types, Advantages & Disadvantages.									
Module 4		Staffing & Leadership						8 hours	
Staffing, Scope of Staffing Functions, Directing: Concept, Principles & Techniques of directing and Coordination Motivation - Theories of Motivation. Theory X, Theory Y, Theory Z. Maslow’s need hierarchy Concept of Leadership-Meaning, Importance, Styles, Supervision, Motivation Communication.									
Module 5		Controlling						8 hours	
Controlling: Concept, Principles, Process and Techniques of Controlling. Relationship between planning and controlling. Case Studies.									
Total Lecture Hours								40 hours

Mode of Evaluation

			CIE				ESE	Total
ST1	ST2	ST3	TA1 5	TA2 5	TA3 5	Attendance 5		
20			20				60	100

Course Code: BBBA0104		Course Name: Managerial Economics		L	T	P	C
Course Offered in: School of Management (BBA)				3	0	0	3
Pre-requisite: Basic knowledge of Economics of class XI & XII							
Course Objectives: The purpose of this course is to apply microeconomics concepts and techniques in evaluating business decisions taken by firms. The emphasis is on explaining how tools of standard price theory can be employed to formulate a decision problem, evaluate alternative courses of action, and finally choose among alternatives.							
Course Outcome: After completion of the course, the student will be able to				Bloom's Knowledge Level (KL)			
CO1	Understand the concepts of Managerial Economics to make effective business decisions.			K2			
CO2	Understand the law of demand & supply & their elasticity.			K2			
CO3	Analyse production concepts, cost concepts and their impact on business decisions			K4			
CO4	Analyse pricing decisions under the different market structures.			K4			
CO5	Evaluate various theories of the firm and how they affect the business decisions			K5			
CO-PO Mapping (Scale 1: Low, 2: Medium, 3: High)							
CO-PO Mapping	PO1	PO2	PO3	PO4	PO5	PO6	
CO1	3	2	1	2	1	1	
CO2	3	2	1	2	1	1	
CO3	3	3	1	2	1	1	
CO4	3	3	1	2	1	2	
CO5	3	2	1	2	1	2	
Course Contents / Syllabus							
Module 1		Fundamentals of Managerial Economics				6 hours	
Definition, Nature and Scope of Economics-Microeconomics and Macro Economics, Ten principles of economics, Managerial Economics and its relevance in business decisions. Incremental Principle, Marginal Principle, Opportunity Cost Principle, Discounting Principle, Concept of Time Perspective, Equi-Marginal Principle, Utility Analysis, Cardinal Utility and Ordinal Utility							
Module 2		Concept - Demand & Supply, Elasticity and Forecasting				12 hours	
Theory of Demand, Types of Demand. Determinants of demand, Demand Function, Demand Schedule, Demand curve, Law of Demand, Exceptions to the law of Demand, Shifts in demand curve, Supply Analysis; Law of Supply, Supply Elasticity; Analysis and its uses for managerial decision making. Elasticity of Demand and its measurement. Price Elasticity, Income Elasticity, Arc Elasticity. Cross Elasticity and Advertising Elasticity. Uses of Elasticity of Demand for managerial decision making Demand forecasting- meaning, significance and methods (in brief).							
Module 3		Production, Cost and Analysis				7 hours	
Production function, Types of production function, Laws of production: Law of diminishing returns, Law of returns to scale, Short-run and Long- run production Cost, Types of costs, Cost output relationship in the short run. Cost output relationship in the Long run. Estimation of revenue. Average Revenue, Marginal Revenue							
Module 4		Market Structures, Monopolistic Competition and Oligopoly				8 hours	
Perfect Competition, features, determination of price under perfect competition. Monopoly: Features, pricing under monopoly, Price Discrimination. Monopolistic competition: basic features, demand and cost, short run equilibrium, long run equilibrium, excess capacity; Oligopoly- Cournot's model, Kinked demand curve model, Dominant price leadership model

Course Contents / Syllabus							
Module 1		Theoretical Framework and Accounting Standard				8 hours	
Financial Accounting: Introduction, Definition, Evolution, Functions, Advantages and Limitations Users of Accounting Information, Branches of Accounting, Accounting Principles: Concepts and Conventions. Accounting Standards: Meaning, Importance, List of Accounting Standards issued by ASB, Indian AS & International Financial Reporting Standards (IFRS).							
Module 2		Recording of financial transactions, P&L and Balance Sheet				8 hours	
Accounting System, Types of Accounts, Accounting Equation, Accounting Cycle, Journal, Ledger and Trial Balance (Including Problems) Profit and Loss Account and Balance Sheet (Sole Proprietorship only).							
Module 3		Depreciation and Stock Valuation Techniques				8 hours	
The nature of depreciation. The accounting concept of depreciation. Factors in the measurement of depreciation. Methods of computing depreciation: straight line method and diminishing balance method; Disposal of depreciable assets-change of method. Meaning, Significance of inventory valuation. Inventory Record Systems: periodic and perpetual. Methods: FIFO, LIFO and Weighted Average.							
Module 4		Hire Purchase and Installment System				8 hours	
Accounting for Hire Purchase Transactions, Journal entries and ledger accounts in the books of Hire Vendors and Hire purchaser for large value items including default and repossession, stock and debtors system							
Module 5		Consignment and Joint Ventures				8 hours	
Consignment: Features, Accounting treatment in the books of the consignor and consignee. Joint Venture: Accounting procedures: Joint Bank Account, Records Maintained by Co- venturer of (a) all transactions (b) only his own transactions. (Memorandum joint venture account).

Course Code: BBBA0101		Course Name: Business Statistics				L	T	P	C
Course Offered in: School of Management (BBA)						2	1	0	3
Pre-requisite: Basic knowledge of statistics.									
Course Objectives: The course in Business Statistics aims to equip students with foundational knowledge and practical skills essential for analyzing and interpreting data in business contexts. Students will delve into fundamental statistical concepts, methods, and techniques necessary for effective decision-making. They will learn how to collect, organize, and summarize data systematically, employing descriptive statistics to gain insights into datasets. Probability theory will be explored, enabling students to assess uncertainties and probabilities crucial for business planning. Through practical applications, students will apply these statistical tools to solve real-world business problems, promoting evidence-based decision-making.									
Course Outcome: After completion of the course, the student will be able to						Bloom’s Knowledge Level (KL)			
CO1	Understand the basic concept of fundamentals of business statistics and its role descriptive analytics.					K1			
CO2	Apply Correlation and Regression analysis into business problems and their implication on Business performance					K4			
CO3	Evaluate basic concepts of probability and perform probability theoretical distributions.					K5			
CO4	Understand the application of time series analysis and index numbers in business decision making.					K2			
CO5	Apply various sampling techniques or Concepts to solve Business Problem.					K4			
CO-PO Mapping (Scale 1: Low, 2: Medium, 3: High)									
CO-PO Mapping	PO1	PO2	PO3	PO4	PO5	PO6

CO4	3	2	1	2	1	1			
CO5	3	3	1	2	1	1			
Course Contents / Syllabus									
Module 1		Matrix Algebra and Business Applications						8 hours	
Introduction, types of matrices, Addition of matrices, Subtraction of matrices, Multiplication of matrices, Transpose of matrix, Expansion of determinants, Minor and Cofactors, Properties of determinant, Applications of matrix operations in business decision making.									
Module 2		Introduction to Statistics and Data Presentation						8 hours	
Statistics: Definition, Importance & Limitation. Collection of data and formation of frequency distribution. Graphical presentation of frequency distribution – Bar Diagram, Histogram, Frequency curve, Frequency polygon, Ogive									
Module 3		Measures of Central Tendency and Dispersion						8 hours	
Measures of central tendency – Mean, Median and Mode. Measures of Dispersion – Range, Mean Deviation, Inter Quartile Range, Quartile Deviation, Mean deviation, Standard Deviation and Coefficient of variation.									
Module 4		Probability and Random Variables						8 hours	
Definition of Probability, Elementary problems of probability, Addition and Multiplication theorems of probability, Expectation and variance of a discrete random variable									
Module 5		Time Series Analysis and Index Numbers						8 hours	

Time series analysis: Concept, Additive and Multiplicative models, And Components of time series, Trend analysis: Least Square method for Linear equations and Applications in business decision-making.

Index Numbers: Meaning, Types of index numbers, uses of index numbers, Construction of Price, Quantity and Volume indices:-Fixed base and Chain base methods.

Course Contents / Syllabus									
Module 1		Introduction to Organizational Behavior						8 hours	
Meaning, importance and historical development of organizational behavior, Factors influencing organizational behavior. Importance of OB to the field of management, Emerging trends and challenges in OB.									
Module 2		Personality, Perception, Attitudes, and Learning						8 hours	
Attitudes and Values, Personality - Concepts, Types , Determinants, individual differences, Big Five Personality Traits, Perception – Process, Errors and Implications of Perception, Concept and theories of learning.									
Module 3		Motivation and Employee Involvement						8 hours	
Concept, importance and theories of motivation. Maslow's Need Hierarchy Theory, Herzberg's Two Factors Theory, Vroom's Expectancy Theory , Redesigning job and work arrangements; Employee Involvement									
Module 4		Group Dynamics and Teamwork						8 hours	
Meaning of groups and group dynamics, Formation, Characteristics and Types of groups, Theories of group dynamics, Five Stage model of group development; Group think and shift; Group and teams; Types of teams									
Module 5		Organizational Change and Development						8 hours	
Organizational Change, Resistance to change, Steps for planned change, Quality Work Life, Organization Development and Interventions, Organization Climate and Managing Organizational Culture									
Total Lecture Hours								40 hours

Course Code: BBBA0203			Course Name: Cost and Management Accounting			L	T	P	C
Course Offered in: School of Management (BBA)						2	1	0	3
Pre-requisite: Basic knowledge of accounting.									
Course Objectives: The objective is to equip the student with basic concepts used in cost accounting and various methods involved in cost ascertainment system. It aims at providing knowledge about the use of Costing data and cost sheet for planning, control and decision making in any organization.									
Course Outcome: After completion of the course, the student will be able to						Bloom’s Knowledge Level (KL)			
CO1	Know the techniques of cost management and absorption of costing concepts.					K2			
CO2	Gain knowledge of standard costing and variance analysis.					K2			
CO3	Practical problems related to budgeting and budgetary control					K3, K4			
CO4	Gain Knowledge about job costing and contract costing.					K2			
CO5	Develop an understanding of various processes costing where the normal and abnormal losses in business.					K2, K6

Course Contents / Syllabus									
Module 1		Costing Approaches and Decision Making					8 hours		
Concept of standard cost and standard costing, Absorption Costing vs. Marginal Costing-Break-even analysis, Margin of safety-Application of Marginal Costing for decision making									
Module 2		Standard Costing and Variance Analysis					8 hours		
Concept of standard cost and standard costing, Advantages and limitations-Computation of variances relating to material and Labour costs only.									
Module 3		Budgeting and Budgetary Control					8 hours		
Meaning, Concepts and Types of Budgets, Budgetary Control Vs Standard Costing-Advantages and limitations-Preparation of Budgets									
Module 4		Job, Batch, and Contract Costing					8 hours		
Meaning, Concepts - Job Costing-Batch Costing-Contract Costing.									
Module 5		Process and Operating Costing					8 hours		
Normal and abnormal losses, equivalent production, Joint and By Products-Operating Costing or Service Costing – Transport, Hotel and Hospital.

Course Code: BBBA0202			Course Name: Business Environment			L	T	P	C
Course Offered in: School of Management (BBA)						3	0	0	3
Pre-requisite: Fundamentals of business environment.									
Course Objectives: The main objective of the course is to acquaint the students with various environmental factors that create a profound impact on the business organization. It would also make the students capable of analyzing and understanding the implications of different macroeconomic policies implemented by the Government.									
Course Outcome: After completion of the course, the student will be able to						Bloom’s Knowledge Level (KL)			
CO1	Familiarize with the nature of Business Environment and its components and analyze the business environment for effective planning					K4			
CO2	Understand the various aspects of the political and legal environment impacting the functioning of a business					K2			
CO3	Get insights into the economic system of India and the policies governing and plan within the framework					K3			
CO4	Understand the impact of socio cultural and technological environment on business					K2			
CO5	Understand the working and contribution of public sector enterprises and the global business environment to seek opportunities to become global.					K4

Course Contents / Syllabus									
Module 1		Business Environment and Environmental Analysis					8 hours		
Meaning of Business Environment, Factors affecting environment to the business, Internal and external environment, microenvironment, macro environment, their impact on business and strategic decisions. Environmental Analysis, Process of Environmental Analysis, Techniques of Environmental Analysis, SWOT Analysis, ETOP, Benefits of Environmental Analysis, Limitations of Environmental Analysis									
Module 2		Political and Legal Environment of Business					8 hours		
Key Elements of Political Environment, Relationship between Business and Government, FEMA, Competition Act, SEBI & Consumer Protection Act, 1986 with latest amendments, EXIM Policy									
Module 3		Economic Environment and Policies					8 hours		
Economic Systems, Economic Planning – Objectives & Strategies of Current Five Year Plan, Formation and Functions of NITI Aayog, Economic Policies – Industrial, Monetary & Fiscal (Tools & Latest Policies).									
Module 4		Socio-Cultural and Technological Environment					8 hours		
Nature and Impact of Culture on Business, Social Responsibilities of Business, Emergence of Middle Class and its influence on Business, Concept and significance of technological environment The Technological Policy, Features & Impact of Technology on Business, Import of technology.									
Module 5		Global Business Environment					8 hours

CO4	2	3	2	2	2	1		
CO5	2	3	2	2	2	2		
Course Contents / Syllabus								
Module 1		Worksheets and Workbooks in Excel					8 Practical	
Features of MS Excel, Worksheets and Workbooks: Definition of Worksheets and Workbooks, Opening, Labeling and Naming Worksheets and Workbooks, Adding, Deleting and Saving Worksheets and Workbooks, Format Worksheet Tabs, Reposition Worksheets, Inserting and Renaming Worksheets, Copy Worksheets, Set Print Titles, Headers/Footers, Page Margins, Page Orientation, Page Breaks, Cell, Cell pointer, Cell address, Change Font Styles and Sizes, Adding Borders and Colors to Cells, Changing Column Width and Row Height, Merge Cells								
Module 2		Charts, Graphics, and Workbook Protection					8 Practical	
Adding, Modifying, cropping an image, rotating an image Images, compressing a Picture, Adding WordArt, Inserting AutoShapes, Adding Clip Art, Adding a Hyperlink, Protect worksheet, protect workbook, share workbook, track Changes. Chart elements: Titles, legend, data labels, creating a New Chart, Formatting the Chart, Types of charts, Using Chart Templates.								
Module 3		Data Sorting, Filtering, and Tables					8 Practical	
Sorting by One Column, Sorting by Colors or Icons, Sorting by Multiple Columns, Sorting by a Custom List, Creating a Custom AutoFilter, Using an Advanced Filter, Group, Ungroup and Subtotals. Tables: Creating a Table, Entering Data into a Table, Sorting Data into a Table, Using Filters to Sort Tables, Data Validation, Consolidation.								
Module 4		Formulas and Functions in Excel					8 Practical	
Creating a Formula, Formula Auditing, Meaning and Advantages of functions, Insert function. SUM, AUTOSUM, SUMIF, SUBTOTAL PRODUCT, POWER, SQRT, ROUND, AVERAGE, AVERAGEIF and AVERAGEIFS, COUNT, COUNTIF, COUNTIFS, MAX MIN, MEDIAN, MODE. Date & time Functions: DATE, NOW, DAY, YEAR, MONTH, TIME, TODAY, WEEKDAY, DATEVALUE, VLOOKUP & HLOOKUP, Rate, Type, PV, FV, NPV, PMT, IPMT, CUMIPMT, IRR, Names, Defining Names, Using and Managing Defined Names.								

Module 5		PivotTables, PivotCharts, and Macros				8 Practical		
PivotTable Layout, Grouping PivotTable Items, updating a PivotTable, formatting a PivotTable using Slicers to manipulate PivotTables, Creating a PivotChart, View Macros, Record Macros, Use relative References

Course Contents / Syllabus

1. At the end of second semester examination, it is mandatory for every student of BBA to undergo on-the-job practical training in any manufacturing, service or financial organization. The training will be of 6 to 8 weeks. The college/institute will facilitate this compulsory training for students.
2. During the training, the student is expected to learn about the organization and analyze and suggest solutions of a live problem. The objective is to equip the student with the knowledge of actual functioning of the organization and problems faced by them for exploring feasible suggestions.
3. During the course of training, the organization (where the student is undergoing training) will assign a problem/project to the student.
4. The student, after the completion of training will submit report to the College/Institute which will form part of third semester examination.
5. The report (based on training and the problem/project studied) prepared by the student will be known as Mini Project. The report should ordinarily be based on primary data. It should reflect in depth study of micro problems, ordinarily assigned by the organization where students undergo training. Relevant tables and bibliography should support it. One comprehensive chapter must be included about the organization where the student has undergone training. This should deal with brief history of the organization, its structure, performance products/services and problems faced. This chapter will form part 1 of the report. Part 2 of the report will contain the study of micro research problems. The average size of report ordinarily will be of minimum 80-100 pages in standard (12) and double spacing. Two neatly typed and soft bound (paperback) copies of the report will be submitted to the College/Institute. The report will be typed in A-4sizepaper.

6. The report will have two certificates. One by the Head of the Department and the other by the Reporting Officer of the organization where the student has undergone training. These two certificates should be attached in the beginning of the report.
7. The Mini Project Report will carry 100 marks and will be evaluated by two examiners (external and internal). The evaluation will consist of (1) Project Report evaluation (2) Project Presentation and Viva. The Project Report evaluation will comprise 50 marks and will be evaluated by internal project guide. The Presentation and Viva Voce would comprise of 50 marks and would be evaluated by two examiners (1 external and 1 internal). The average marks awarded by the 2 examiners will be considered for the results. In case the difference in the awards given by the examiners is 30 or more marks, the project report will be referred to the third examiner. Only such person will evaluate the project report who has minimum three years of experience of teaching BBA classes in a College/University. Experience of teaching BBA classes as guest faculty shall not be counted.
8. It is mandatory that the student make presentations in the presence of teachers and students. The student is expected to answer the queries and questions raised in such a meeting.
9. The students can prepare the Mini Project Report as per the format given in the Summer Training Manual as prescribed by the University.

Project Report Evaluation:

Relevance of Objectives with Topic	Relevance of Research Methodology	Interpretation and Analysis	Total
10	20	20	50

Presentation and Viva Voce Presentation:

Relevance of Objectives with Topic	Relevance of Research Methodology	Interpretation and Analysis	Presentation and Communication Skills	Query Handling	Total
5	10	15	15	5	50
