III semester

* List of MOOCs (NPTEL) Based Recommended Courses for first year B. Tech Students

1. Developing Soft Skills and personality-Odd Semester-8 Weeks-3 Credits

2. Enhancing Soft Skills and personality-Even Semester-8 Weeks-3 Credits

* AICTE Guidelines in Model Curriculum:

After successful completion of 166 credits, a student shall be eligible to get Under Graduate degree in Engineering. A student will be eligible to get Under Graduate degree with Honours only, if he/she completes additional university recommended courses only (Equivalent to 20 credits; NPTEL Courses of 4 Weeks, 8 Weeks and 12 Weeks shall be of 2, 3 and 4 Credits respectively) through MOOCs. For registration to MOOCs Courses, the students shall follow NPTEL Site http://nptel.ac.in/ as per the NPTEL policy and norms. The students can register for these courses through NPTEL directly as per the course offering in Odd/Even Semesters at NPTEL. These NPTEL courses (recommended by the University) may be cleared during the B. Tech degree program (not necessary one course in each semester). After successful completion of these MooCs courses the students, shall, provide their successful completion NPTEL status/certificates to the University (COE) through their college of study only. The student shall be awarded Hons. Degree (on successful completion of MOOCS based 20 credit) only if he/she secures 7.50 or above CGPA and passed each subject of that Degree Programme in single attempt without any grace marks.

*Foreign Language :

- 1. AASL0202 French
- 2. AASL0203 German
- 3. AASL0204 Japanese

Course Code	ACSE0101	L	Т	Ρ	Credit
Course Title	Problem solving using Python	3	0	0	3
Course object	ive:	ł			I
1	To impart knowledge of basic building blocks	s of Python	pro	ogram	ming
2	To provide skills to design algorithms for pro	blem solvi	ng		
3	To impart the knowledge of implementation a programs in Python	nd debugg	ging	of ba	sic
4	To disseminate the knowledge of basic data s	tructures			
5	To provide the knowledge of file system conc data handling	epts and it.	s ap	plicat	ion in

Pre-requisites:Students are expected to be able to open command prompt window or terminal window, edit a text file, download and install software, and understand basic programming concepts.

Course Contents / Syllabus

UNIT-I	Basics of python programming
--------	------------------------------

8 hours

Introduction: Introduction to computer system, algorithms, Ethics and IT policy in company, Feature of object-oriented programming, A Brief History of Python, Applications areas of python, The Programming Cycle for Python, Python IDE, Interacting with Python Programs.

Elements of Python:keywords and identifiers, variables, data types and type conversion, operators in python, expressions in python, strings.

UNIT-II	Decision Control Statements	8 hours

Conditionals: Conditional statement in Python (if-else statement, its working and execution),

Nested-if statement and elif statement in Python, Expression Evaluation & Float Representation.

Loops: Purpose and working of loops, while loop, For Loop, Nested Loops, Break and Continue, pass statement.

UNIT-III	Function and Modules	8 hours
	Function, calling a function, Function arguments, built in fur function to a function, recursion, Lambda functions	nction, scope
	Packages: Importing Modules, writing own modules, Stand Function, Packages in Python	dard library
UNIT-IV	BasicData structures in Python	8 hours
Strings: Basic expressions.	operations, IndexingandSlicing of Strings, Comparing strin	ngs, Regular
•	Data Structure: Sequence, Unpacking Sequences, Mutable rehension, Looping in lists, Tuples, Sets, Dictionaries	Sequences,
UNIT-V	File and Exception handling	8 hours
statement, Rais	rting:Simple search & Binary search,Selection Sort, Merge Sort	
<i>CO 1</i>	Write simple python programs.	K ₂ , K ₃
<i>CO 2</i>	Develop python programs using decision control statements	K ₃ , K ₆
СО 3	Implement user defined functions and modules in python	K_2
<i>CO</i> 4	Implement python data structures –lists, tuples, set, dictionaries	<i>K</i> ₃
<i>CO</i> 5	Perform input/output operations with files in python and implement searching, sorting and merging algorithms	K ₃ , K ₄

		B.TECH. FIRST YEAR					
Lab	Code	ACSE0151 L	ТР	Credit			
Lab	Title	Problem Solving using Python Lab 0	0 2	1			
Cour	se out	come: At the end of course, the student will be able	to	I			
CO	1	Write simple python programs.		K ₂ , K ₃			
CO	2 I	mplement python programs using decision control statements		K ₃ , K ₆			
CO	3 V	Writing python programs using user defined functions and modu	les	K ₂			
СО		mplement programs using python data structures –lists, tuples, lictionaries	, set,	K ₃			
CO	5 V	Write programs to perform input/output operations on files		K ₃ , K ₄			
List o	f Expe	eriment:					
	1	List of Fundamental Programs		1			
S.N.		Program Title		Catagory			
1	-	n Program to print "Hello Python"		Basic			
2	Python Program to read and print values of variables of different data types. Basi						
3		n Program to perform arithmetic operations on two integer numb	oers	Basic			
4	Pytho	n Program to Swap two numbers		Basic			
5	Pytho	n Program to convert degree Fahrenheit into degree Celsius		Operators			
6	Pytho	n Program to demonstrate the use of relational operators.		Operators			
7	Pytho	n Program to understand the working of bitwise and logical oper	ators.	Operators			
8	Pytho	n Program to calculate roots of a quadratic equation.		Conditio nal			
9	Pytho	n Program to check whether a year is leap year or not.		Conditio nal			
10	Pytho	n Program to find smallest number among three numbers.		Conditio nal			
11	Pytho	n Program to make a simple calculator.		Conditio nal			
12	Pytho	n Program to find the factorial of an integer number.		Loop			
13		n Program to find the reverse of an integer number.		Loop			
14	-	n Program to find and print all prime numbers in a list.		Loop			
15	-	n Program to Find the Sum of 'n' Natural Numbers		Loop			
16		n Program to print sum of series: $-1/2 + 2/3 + 3/4 + \dots + n/(n+1)$		Loop			
17		n Program to print pattern using nested loop		Loop			
18		n Program to Display the multiplication Table of an Integer		Loop			

19	Python Program to Print the Fibonacci sequence	Loop
20	Python Program to Check Armstrong Number	Loop
21	Python Program to Find Armstrong Number in an Interval	Loop
22	Python Program to check Using function whether a passed string is palindrome	Function
	or not	
23	Python Program using function that takes a number as a parameter, check	Function
	whether the number is prime or not.	
24	PythonProgram using function that computes gcd of two given numbers.	Function
25	Python Program to Find LCM of two or more given numbers.	Function
26	Python Program to Convert Decimal to Binary, Octal and Hexadecimal	Function
27	Python Program To Find ASCII value of a character	Basic
28	Python Program to Display Calendar	Loop
29	Python Program to Add Two Matrices	Loop
30	Python Program to Multiply Two Matrices	Loop
31	Python Program to Transpose a Matrix	Loop
32	Python Program to Sort Words in Alphabetic Order	Sorting
33	Python Program to Display Fibonacci Sequence Using Recursion	Recursio
		n
34	Python Program to Find Factorial of Number Using Recursion	Recursio
		n
35	Python Program that implements different string methods.	String
36	Python Program that validates given mobile number. Number should start with	String
	7, 8 or 9 followed by 9 digits.	
37	Python Program to implement various methods of a list.	List
38	Python Program that has a nested list to store toppers details. Edit the details and reprint them.	List
39	Python Program to swap two values using tuple assignment.	Tuple

1.	String Rotation							
	Problem Description							
	Rotate a given String in the specified direction by specified magnitude.							
	After each rotation make a note of the first character of the rotated String, after all rotation							
	are performed the accumulated first character as noted previously will form another string,							
	say FIRSTCHARSTRING.	atria						
	Check If FIRSTCHARSTRING is an Anagram of any substring of the Original If yes print "YES" otherwise "NO". Input	string.						
	The first line contains the original string s. The second line contains a single in	teger q. The						
	ith of the next q lines contains character d[i] denoting direction and integer r	[i] denoting						
	the magnitude.							
	Constraints							
	$1 \le$ Length of original string ≤ 30							
	$1 \le q \le 10$							
	Output							
	YES or NO							
	Explanation							
	Example 1							
	Input							
	carrace 3							
	5 L 2							
	R 2							
	Output							
	NO							
	Explanation							
	After applying all the rotations, the FIRSTCHARSTRING string will be "rcr" which is not							
	anagram of any sub string of original string "carrace".							
2.	Jurassic Park							
	Problem Description							
	Smilodon is a ferocious animal which used to live during the Pleistocene epoc	· ·						
	10,000 years ago). Scientists successfully created few smilodons in an experim							
	research. A park is established and those smilodons are kept in a cage for visito							
	This park consists of Grasslands(G), Mountains(M) and Waterbodies(W) and	it has three						
	gates (situated in grasslands only). Below is a sample layout.							

w	М	G	G	G	G
м	G	w	G	М	м
G	G	G	G	G	G
w	G	G	м	w	G

Before opening the park, club authority decides to calculate Safety index of the park. The procedure of the calculation is described below. Please help them to calculate. Safety Index calculation

Assume a person stands on grassland(x) and a Smilodon escapes from the cage situated on grassland(y). If the person can escape from any of those three gates before the Smilodon able to catch him, then the grassland(x) is called safe else it is unsafe. A person and a Smilodon both take 1 second to move from one area to another adjacent area(top, bottom, left or right) but a person can move only over grasslands though Smilodon can move over grasslands and mountains.

If any grassland is unreachable for Smilodon(maybe it is unreachable for any person also), to increase safe index value Club Authority use to mark those grasslands as safe land. Explained below

w	М	G	G	G	G	
м	G	w	G(x)	м	M	
G	W	G	G(y)	G	G	
w	G(z)	W	м	w	G	

For the above layout, there is only one gate at (4,6)

Y is the position of Smilodon's cage

X is not safe area

Z is a safe area as is it not possible for smilodon to reach z

Safety index=(total grassland areas which are safe*100)/total grassland area

Constraints

i. $3 \le R, C \le 10^{3}$

- ii. Gates are situated on grasslands only and at the edge of the park
- iii. The cage is also situated in grassland only
- iv. The position of the cage and the position of three gates are different

Input Format

The first line of the input contains two space-separated integers R and C, denoting the size of the park (R*C)

The second line contains eight space-separated integers where

First two integers represent the position of the first gate

3rd and 4th integers represent the position of second gate

5th and 6th integers represent the position of third gate respectively

	The last two integers represent the position of the cage
	Next R lines, each contains space separated C number of characters. These R lines
	represent the park layout.
	Output
	Safety Index accurate up to two decimal places using Half-up Rounding method
	Explanation
	Example 1
	Input
	44
	11213113
	G GGG
	G W W M
	GGWW
	MGMM
	Output
	75.00
3.	Bank Compare
	Problem Description
	There are two banks; Bank A and Bank B. Their interest rates vary. You have received
	offers from both bank in terms of annual rate of interest, tenure and variations of rate of
	interest over the entire tenure.
	You have to choose the offer which costs you least interest and reject the other.
	Do the computation and make a wise choice.
	The loan repayment happens at a monthly frequency and Equated Monthly Installment
	(EMI) is calculated using the formula given below :
	EMI = loanAmount * monthlyInterestRate/(1 - 1 / (1))
	+monthlyInterestRate)^(numberOfYears * 12))
	• / /
	Constraints i. 1 <= P <= 1000000
	i. $1 < T < 1000000$ ii. $1 < T < 50$
	11. 1 < 1 < 30 11. 1 <= N1 <= 30
	iv. $1 \le N2 \le 30$
	Input Format
	First line : P – principal (Loan Amount)
	Second line : T – Total Tenure (in years).
	Third Line : N1 is number of slabs of interest rates for a given period by Bank A. First slab
	starts from first year and second slab starts from end of first slab and so on.
	Next N1 line will contain the interest rate and their period.
	After N1 lines we will receive N2 viz. the number of slabs offered by second bank.
	Next N2 lines are number of slabs of interest rates for a given period by Bank B. First slab
	starts from first year and second slab starts from end of first slab and so on.
	surve from those jour and booond blad barts from one of first slad and so on.

	The period and rate will be delimited by single white space.
	Output
	Your decision – either Bank A or Bank B.
	Explanation
	Example 1
	Input
	10000
	20
	3
	5 9.5
	10 9.6
	5 8.5
	3
	10 6.9
	5 8.5
	5 7.9
	Output
	Bank B
4.	Cross Words
	Problem Description
	A crossword puzzle is a square grid with black and blank squares, containing clue numbers
	(according to a set of rules) on some of the squares. The puzzle is solved by obtaining the
	solutions to a set of clues corresponding to the clue numbers.
	The solved puzzle has one letter in each of the blank square, which represent a sequence of
	letters (consisting of one or more words in English or occasionally other languages)
	running along the rows (called "Across", or "A") or along the columns (called "Down" or
	"D"). Each numbered square is the beginning of an Across solution or a Down solution.
	Some of the across and down solutions will intersect at a blank square, and if the solutions
	are consistent, both of them will have the same letter at the intersecting square.
	In this problem, you will be given the specifications of the grid, and the solutions in some
	random order. The problem is to number the grid appropriately, and associate the answers
	consistently with the clue numbers on the grid, both as Across solutions and as Down
	solutions, so that the intersecting blank squares have the same letter in both solutions.
	Rules for Clue Numbering
	The clue numbers are given sequentially going row wise (Row 1 first, and then row2 and
	so on)
	Only blank squares are given a clue number
	A blank square is given a clue number if either of the following conditions exist (only one
	number is given even if both the conditions are satisfied)
	It has a blank square to its right, and it has no blank square to its left (it has a black square
	to its left, or it is in the first column). This is the beginning of an Across solution with that

number

It has a blank square below it, and no blank square above it (it has a black square above it or it is in the first row). This is the beginning of a Down solution with that number

Constraints

i. 5<=N<=15

ii. 5<=M<=50

Input Format

The input consists of two parts, the grid part and the solution part

The first line of the grid part consists of a number, N, the size of the grid (the overall grid is N x N) squares. The next N lines correspond to the N rows of the grid. Each line is comma separated, and has number of pairs of numbers, the first giving the position (column) of the beginning of a black square block, and the next giving the length of the block. If there are no black squares in a row, the pair "0,0" will be specified. For example, if a line contains "2,3,7,1,14,2", columns 2,3,4 (a block of 3 starting with 2), 7 (a block of 1 starting with 7) and 14,15 (a block of 2 starting with 14) are black in the corresponding row.

The solution part of the input appears after the grid part. The first line of the solution part contains M, the number of solutions. The M subsequent lines consist of a sequence of letters corresponding to a solution for one of the Across and Down clues. All solutions will be in upper case (Capital letters)

Output

The output is a set of M comma separated lines. Each line corresponds to a solution, and consists of three parts, the clue number, the letter A or D (corresponding to Across or Down) and the solution in to that clue (in upper case)

The output must be in increasing clue number order. If a clue number has both an Across and a Down solution, they must come in separate lines, with the Across solution coming before the Down solution.

Explanation Example 1 Input 5 5,1

CALVE PLEAS

5,1 1,1,3,1,5,1 0,0 1,1,3,1,5,1 1,1 5 EVEN ACNE

		E	E	NE	E	E	F	•				
		E	E	NE	E	E	F					

there.

A contestant asks you to figure out the number of squares at the North or West boundary (top or left boundary in the map) from which it is feasible to reach the destination.

Constraints

i. 5<=N<=50

Input Format

The first line of the input is a positive integer N, which is the number of squares in each side of the grid.

The next N lines have a N strings of characters representing the contents of the map for that corresponding row. Each string may be F, representing the Final destination, D, representing a drop square, or a set of up to three of the possible four directions (N,E,S,W) in some random order. These represent the directions in which the contestant can maneuver the skateboard when in that square.

Output

The output is one line with the number of North or West border squares from which there is a safe way to maneuver the skateboard to the final destination.

6. Chakravyuha

Problem Description

During the battle of Mahabharat, when Arjuna was far away in the battlefield, Guru Drona made a Chakravyuha formation of the Kaurava army to capture YudhisthirMaharaj. Abhimanyu, young son of Arjuna was the only one amongst the remaining Pandava army who knew how to crack the Chakravyuha. He took it upon himself to take the battle to the enemies.

Abhimanyu knew how to get power points when cracking the Chakravyuha. So great was his prowess that rest of the Pandava army could not keep pace with his advances. Worried at the rest of the army falling behind, YudhisthirMaharaj needs your help to track of Abhimanyu's advances. Write a program that tracks how many power points Abhimanyu has collected and also uncover his trail

A Chakravyuha is a wheel-like formation. Pictorially it is depicted as below

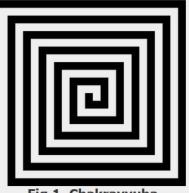

Fig 1. Chakravyuha

A Chakravyuha has a very well-defined co-ordinate system. Each point on the co-ordinate system is manned by a certain unit of the army. The Commander-In-Chief is always located at the centre of the army to better co-ordinate his forces. The only way to crack the Chakravyuha is to defeat the units in sequential order.

A Sequential order of units differs structurally based on the radius of the Chakra. The radius can be thought of as length or breadth of the matrix depicted above. The structure i.e. placement of units in sequential order is as shown below

1	2	3	4	5
16	17	18	19	6
15	24	25	20	7
14	23	22	21	8
13	12	11	10	9

The entry point of the Chakravyuha is always at the (0,0) co-ordinate of the matrix above. This is where the 1st army unit guards. From (0,0) i.e. 1st unit Abhimanyu has to march towards the center at (2,2) where the 25th i.e. the last of the enemy army unit guards. Remember that he has to proceed by destroying the units in sequential fashion. After destroying the first unit, Abhimanyu gets a power point. Thereafter, he gets one after destroying army units which are multiples of 11. You should also be a in a position to tell YudhisthirMaharaj the location at which Abhimanyu collected his power points.

Input Format:

First line of input will be length as well as breadth of the army units, say N

Output Format:

- Print NxN matrix depicting the placement of army units, with unit numbers delimited by (\t) Tab character
- Print Total power points collected
- Print coordinates of power points collected in sequential fashion (one per

			line)

13.										
	Problem Des									
	A positive integer d is said to be a factor of another positive integer N if when N is divided									
	by d, the remainder obtained is zero. For example, for number 12, there are 6 factors 1, 2,									
	-			integer k has at least two factors, 1 and the number 1						
			-	ers N and k, write a program to print the kth largest factor o						
	N.	1	0							
	Input Forma	t:								
	-		-separated	d list of positive integer pairs (N, k)						
	Output Form		1							
	•			lass Tast. TA: Taachar Assassment, DS: Dractical Sossienal, TE: Th						

S. NO.	Debugging Experiments
	6132
	Sample Output:
	13
	Sample Input:
	0 <n<1000< th=""></n<1000<>
	Constraints
	4th – number of 1 Rupee coins.
	3rd – number of 2 Rupee coins.
	2nd – number of 5 Rupee coins.
	1st – Total Number of coins
	Four Space separated Integer Values
	Output Format
	Input Format A single integer value
	equals 14, i.e., exceeds 13, this is not the answer.
	However, if one takes two 5 Rupee coins, one 2 rupee coins and two 1 rupee coins, then t all values between 1 and 13 are achieved. But since the cumulative value of all coin equals 14 i.e. exceeds 13 this is not the answer
	between 1 and 13. Hence this is the answer.
	One 5 Rupee, three 2 Rupee and two 1 Rupee coins are required to realize any value
	then the minimum number of coins required to formulate any value between 1 and 13, is 0
	Let's understand the problem using the following example. Consider the value of N is 1.
	Rupee, 2 Rupee and 5 Rupee.
	inclusive. Cumulative value of coins should not exceed N. Coin denominations are
	Find the minimum number of coins required to form any value between 1 to N, bot
	Problem Description
14.	Coins Distribution Question (or Coins Required Question)
	largest factor is 4. The output must be 4
	N is 12, k is 3. The factors of 12 are (1,2,3,4,6,12). The highest factor is 12 and the third
	Explanation:
	4
	Output:
	12,3
	Input:
	Example 1
	1 <n<1000000000. 13.<="" 1<k<600.="" an="" assume="" can="" factors="" have="" larger="" n="" no="" prime="" td="" than="" that="" which="" will="" you=""></n<1000000000.>
	Constraints:

1.	Write error/output in the following code.
	# abc.py
	deffunc(n): return n + 10
	func('Hello')
2.	Write the output of the following code.
	if not a or b:
	print 1
	elif not a or not b and c:
	print 2 elif not a or b or not b and a:
	print 3
	else:
	print 4
3.	Write error/output in the following code.
	count = 1
	defdoThis():
	global count
	for i in (1, 2, 3):
	$\operatorname{count} += 1$
	doThis()
	print count
4.	Write the output of the following code.
	check1 = ['Learn', 'Quiz', 'Practice', 'Contribute']
	check2 = check1
	check3 = check1[:]
	check2[0] = 'Code'
	check3[1] = 'Mcq'
	count = 0
	for c in (check1, check2, check3):
	if c[0] == 'Code':
	$\operatorname{count} += 1$
	if c[1] == 'Mcq':

	$\operatorname{count} += 10$
	print count
5.	What is the output of the following program?
	D = dict()
	for x in enumerate(range(2)):
	D[x[0]] = x[1]
	D[x[1]+7] = x[0]
	print(D)
6.	What is the output/error in the following program?
	$D = \{1 : 1, 2 : '2', '1' : 1, '2' : 3\}$
	D['1'] = 2
	print(D[D[D[str(D[1])]]])
7.	What is the output/error in the following program?
	D = (1 + (1 + 1 + 1 + 1)) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1) + (2 + 1

	B. TECH FIRST YEAR		
Course Code	ACSE0203	LTP	Credits
Course Title	DESIGN THINKING I	3 1 0	4
breakthrough inne	tives: this course is to familiarize students with design thin ovation. It aims to equip students with design thinking sk ideas, develop solutions for real-time problems.		
Pre-requisites	: None		
1101044151005	Course Contents / Syllabus		
UNIT-I	Introduction		8 HOURS
organizations, cre	problems. Innovation and creativity, the role of inneativity in teams and their environments, design mindse design, 13 Musical Notes for Design Mindset, Example as the world	t. Introducti	on to elements
UNIT-II	Ethical Values and Empathy		8 HOURS
definite human c and character. U Empathy tools- customer journey	nding core values and feelings, negative sentiments and onduct: universal human goal, developing human consc Understand stakeholders, techniques to empathize, ide Interviews, empathy maps, emotional mapping, imm y maps, and brainstorming, Classifying insights after 's &Don'ts for Brainstorming, Individual activity- 'Mocc	iousness in entify key mersion and Observation	values, policy user problems l observations
UNIT-III	Problem Statement and Ideation		10 HOURS
Defining the pro- identifying driver basic design dire sketching and pro- why's, "How M Association Tech	blem statement, creating personas, Point of View (PC rs, information gathering, target groups, samples, and fe ctions, Themes of Thinking, inspirations and references esenting ideas, idea evaluation, double diamond approa ight We",Defining the problem using Ice-Cream Stic mique, Mind-Map,ideation activity games - six thinking sual collaboration and brainstorming tools - Mural, JamE	edbacks. Id , brainstorm ch, analyze ks, Metaph g hats, milli	ents. Research ea Generation ning, inclusion – four W's, s or & Randon
UNIT-IV	Critical Thinking		6 HOURS
characteristics of	cepts of critical thinking, the difference between critic critical thinkers, critical thinking skills- linking idea agruences, five pillars of critical thinking, argumentation	as, structuri	ing arguments

 Arun Jain, UnMukt : Science & Art of Design Thinking, 2020, Polaris Jeanne Liedta, Andrew King and Kevin Benett, Solving Problems with Design Thinking - Ten Stories of What Works,2013,Columbia Business School Publishing RR Gaur, R Sangal, G P Bagaria, A Foundation Course in Human Values and Professiona Ethics, First Edition, 2009, Excel Books: New Delhi Reference Books Vijay Kumar, 101 Design Methods: A Structured Approach for Driving Innovation in You Organization, 2013, John Wiley and Sons Inc, New Jersey BP Banerjee, Foundations of Ethics and Management, 2005, Excel Books Gavin Ambrose and Paul Harris, Basics Design 08: Design Thinking, 2010, AVA Publishing SA Roger L. UNIT-V	Fiber Optics & Laser	8 hours
Fiber Optics: Int	roduction to fiber optics, Acceptance angle, Numerical aperture, I	Normalized frequency,
Classification of	fiber, Attenuation and Dispersion in optical fibers.	
Laser: Absorptio	n of radiation, Spontaneous and stimulated emission of radiation, 1	Einstein's coefficients,
Population invers	sion, Ruby Laser, He-Ne Laser.	
Recent application	onsof optical fibersandLaser(Qualitative):Laser-guided UAV (Dron	e).
Course outco	me: After completion of this course students will be able	to:
CO 1	Solve the relativistic mechanics problems	K1,K2,K3
CO 2	Apply the concept of quantum mechanics	K1,K2,K3
CO 3	Apply the laws of optics and their application in various processes	K1,K2,K3
CO 4	Define the laws of semiconductors.	K1,K2
CO 5	Explain the working of modern engineering tools and techniques of optical fiber and laser.	K1,K2

		B. TECH FIRST YEAR					
Course C	ode	ACSE0202	L	т	Ρ	Credit	
Course T	itle	Problem solving using Advanced Python	3	1	0	4	
Course of	oject	ive: The objective of the course is to make its	stuc	lent	s ab	le	
1	To lea	rn the Object Oriented Concepts in Python					
2	To lea	rn the concept of reusability through inheritance and	poly	moi	phis	m	
3	To im	part the knowledge of functional programming					
4 7	To lea	rn the concepts of designing graphical user interfaces					
5	To exp	plore the knowledge of standard Python libraries					
Pre-requi	isites	Students are expected to have basic knowledge of p	orog	ram	ming	g concepts	
of python pi	rograr	nming.					
		Course Contents / Syllabus					
UNIT-I Classes and Objects							
Introduction	n: Pyt	non Classes and objects, User-Defined Classes, Enca	psul	atio	n, D	ata hiding	
, Class Vari	iables	and Instance Variables, Instance methods, Class m	ethc	od, s	tatic	methods,	
constructor	in py	thon, parametrized constructor, Magic Methods in	pyt	hon,	Ob	ject as an	
argument, In	nstanc	es as Return Values, namespaces					
UNIT-II		Object Oriented Concepts				8 hours	
	on: In	Nethod overriding, abstract class, MRO and super (), trospecting types, Introspecting objects, Introspec ect tools		•	•		
UNIT-III		Functional Programming				8 hours	
Map, filter,	Redu	ce, Comprehensions, Immutability, Closures and Dec	orat	tors,	gen	erators,	
Co-routines	, itera	tors, Declarative programming					
UNIT-IV		GUI Programming				8 hours	
Ipywidgets	Packa	ge, Numeric Widgets, Boolean Widgets, Selection Wi	dge	ts, S	tring	g Widgets,	
	, Colo	r Picker, Container Widgets, Creating a GUI Application	on, 1	「kint	er, k	outton,	
canvas.							
UNIT-V		Libraries in Python				8 hours	
•		peration, Indexing, slicing and Iterating, multidimen			•	•	
• •		ing and writing data on Files, Pandas : Series and D					
00 0	-	ge Data Frames, Generate summary tables, Group da			•	· ·	
-		data. SciPy: Introduction to SciPy, Create functio				-	
-		ter plot, Bar charts, histogram, Stack charts, Legend t		-		-	
-	-	function in pandas, Labelling and arranging figures, lor palettes, distribution plots, category plot, regression		-	ots.	Seaborn:	
WIND TIMOTIC	m co			OT			

Course outcome: At the end of course, the student will be able to					
CO 1	Define classes and create instances in python	K ₁ , K ₂			
CO 2	Implement concept of inheritance and polymorphism using python	K ₃			
CO 3	Implement functional programming in python	K ₂			
CO 4	Create GUI based Python application	K ₃			
CO 5	Applythe concept of Python libraries to solve real world problems	K ₃ , K ₆

Course Code	AASL0202	LTP	Credit		
Course Title	French	200	02		
Course objectiv	/e:				
1	An introduction to French language and learn to understand and articulate in situations.				
2	The course provides a foundation in the foundation (Listening, Speaking, Reading, and Writing				
Pre-requisite: • The studen	nt should be able to communicate in English.				
	Course Contents / Syllabus				
UNIT-I	Introduction to French	7 H	7 Hours		
➤ Basic gree	etings and introductions				
➤ Difference	es and similarities between English and French alp	habets			
➤ Recognize	e and spell simple words and phrases in French				
≻ Commonl	y used nouns and adjectives				
	Vaaabulam Duilding		8 Hours		
UNIT-II	Vocabulary Building				
	oneself and others				
➤ Introduce		s/ seasons/colour	s		
➢ Introduce➢ Identify, s	oneself and others	s/ seasons/colour	s		
➢ Introduce➢ Identify, s➢ Speak and	oneself and others peak and understand the days of the week/ months		S		
 ➢ Introduce ➢ Identify, s ➢ Speak and ➢ Understand 	oneself and others peak and understand the days of the week/ months l understand simple weather expressions		S		

UNIT-III	Everyday Common Simple Sentences	7 Hours
> In the city/	naming places and buildings	1
\gg Means of tr	ansport / basic directions	
≻ Listen to, u	nderstand, and respond to everyday conversation	
\gg Respond to	questions about ourselves and family members	
\gg Use the sin	ngular and plural of regular nouns (-s).	
UNIT-IV	Reading	10 Hours
	a, groceries and meal	
	fe/ telling time	
➤ Making app > Use definit	te and indefinite articles.	
	te and indefinite articles.	1
UNIT-V	Writing	8 Hours
➤ Fill in a sin	ple form (fiched'inscription/carte d'identité)	1
➢ Describe pi	ctures (Speak and Write)	
> Write a sho	rt text on oneself	
Course outcome At the end of the	course students will be able to	
CO 1	Recognize the basic sounds, letters, numbers, words and phrases of French.	
CO 2	Develop basic French vocabulary	
CO 3	Use simple phrases in real life conversations	
CO 4	Read simple sentences	
	Write simple sentences and fill in a form	

		B.TECH FIRST YEAR (Foreign Language)		
Course	Code	AASL0203	L T P	Credit
Course	Гitle	German	2 0 0	02
Course	objective:	•		
1		roduction to German language and culture. Students with and articulate in day to day real-life situations.	ll learn to	
2		urse provides a foundation in the four basic skills LSRW (List ng, Reading, and Writing) of language learning.	ening,	
	Juisites: The student sho	ould be able to communicate in basic English.

15	To study the ferromagneti				rve a	and th	then	to e	stima	ate th	ie re	tent	tively	and	coe	erciv	vity	of	`a given
16	To determine	e the	angle	of di	iverg	gence	e of la	aser	beam	ı usin	g He	e-Ne	e Las	er.					

17	To determine the wavelength of laser using diffraction grating.
18	To determine the numerical aperture of optical fiber.
Lab Co	ourse Outcome: After completion of this course students willbeable to:
CO 1	Apply the practical knowledge of the phenomenon of interference, diffraction and polarization.
CO 2	Understand energy band gap and resistivity.
CO 3	Develop the measurement techniques of magnetism.
CO 4	Analyze the flow of liquids.

B. TECH FIRST YEAR							
Lab Co	de ACSE0252	ACSE0252 LTP					
Lab Title Problem Solving using Advanced Python Lab			1				
Course	outcome: At the end of course, the student will be ab	le to	1				
CO 1 Write programs to create classes and instances in python							
CO 2 write programs to Implement concept of inheritance and polymorphism using python							
CO 3 Write programs using functional programming in python							
CO 4 write programs to create GUI based Python application							
CO 5 Developing real life applications using python libraries to solve real world problems							

List of Experiment :

S.No.	Name of Experiment			
	Class and Methods			
1	Python program to demonstrate instantiating a class.			
2	Python program to demonstrate use of class method and static method			
3	Python program to implement constructors.			
4	Python program to show that the variables with a value assigned in the class			
	declaration, are class variables and variables inside methods and constructors are			
	instance variables.			
5	Python program to create Bank-account class with deposit, withdraw function			
	Inheritance			
6	Python program to demonstrate single inheritance			
7	Python program to demonstrate multilevel inheritance			
8	Python program to demonstrate multiple inheritance			
9	Python program to demonstrate hierarchical inheritance			
10	Python program to demonstrate hybrid inheritance			
	Polymorphism			
11	Python program to demonstrate in-built polymorphic function			
12	Python program to demonstrate user defined polymorphic functions			
13	Python program to demonstrate method overriding			
	Functional Programming			
14	Python program to demonstrate working of map			

15	Python program to demonstrate working of filter			
16	Python program to demonstrate working of reduce			
17	Python program to demonstrate immutable data types			
18	Python program to demonstrate Monkey Patching in Python			
19	Python program to demonstrate decorators with parameters in python			
20	Python program to demonstrate conditional decorators			
21	Python program to demonstrate nested decorators			
22	Python program to demonstrate chain multiple decorators			
23	Python program to demonstrate use of generators			
24	Python program to demonstrate working of iterators			
25	5 Write a Python program to create a table and insert some records in that table. Finally			
	selects all rows from the table and display the records.			
	GUI Programming			
26	Python Program to understand working of various Tkinter widgets			
27	Create a Distance-time GUI calculator using Tkinter			
28	Write a NumPy program to calculate the difference between the maximum and the			
	minimum values of a given array along the second axis.			
29	Write a Python program to create a 2-D array with ones on the diagonal and zeros			
	elsewhere. Now convert the NumPy array to a SciPy sparse matrix in CSR format.			
30	Write a Python program to add, subtract, multiple and divide two Pandas Series.			
31	Write a program to Create Your Plot using python. Also add and delete axes.			
32	Write a program to plot data using seaborn and show the plot.			

			B. TECH FIRST YEAR			
Cours	se Code	AME0252	L	ТР	Credit	
Cours			ng Graphics & Solid Modelling 0	0 0 3	1.5	
Cours	se object	ive:				
1	To famili	arize the stu	dents with the concepts of Engineering Graphics and pro-	ovide		
	understar	nding of the	drafting, principles, instruments, standards, conventions	of drawi	ings,	
	scales, cu	irves etc.				
2	To impar	t knowledge	e about projections of point, lines and planes.			
3	To make the students able tounderstandorthographic projections of simple solids and their					
	sections a	and develop	ment of curves for lateral surfaces			
4			le to prepare engineering drawing using CAD software.			
5	To make	them capabl	le to prepare engineering drawing using CREO software	•		
Pre-r	equisites	: Knowledg	e of basic geometry.			
			Course Contents / Syllabus			
UNIT	`-I		Introduction		6 hours	
Introdu	iction to er	ngineering g	raphics, Convention for Lines and their uses, Symbols	for differ	ent materials	
and sur	face finish	, Methods o	f dimensioning, Scales, Cycloidal curves and involutes.	(1 Sheet))	
UNIT	-II		Projection of points, lines and planes		6 hours	
Project	tion of poir	nts, lines and	planes. (1 Sheet)	I		
UNIT	-III		Projection of solids and Sections of solids an	d	6 hours	
			Development of surfaces			
Orthog	raphic pro	jections of r	regular solids. Projection of section of regular solids. D	evelopm	ent of lateral	
surface	s of regula	r solids(2sh	eet)			
UNIT	-IV		Introduction to CAD		9 hours	
Introdu	iction to C	omputer Aid	led Drawing: Drawing practice using various commands	s (Array,	block, scale,	
fillet, c	hamfer, ha	atch etc.), A	bsolute coordinate systems, Polar coordinate systems an	nd relativ	ve coordinate	
system	s, Drawin	g practice u	using dimensioning, Drawing of 2D planes; circle, p	olygons	, ellipse etc,	
Drawir	ng practice	using 3D p	rimitives; Drawing of cone Prism, pyramid etc.; Create	solids u	sing extrude,	
revolve	e command	ls, Working	drawings of various mechanical systems. (4 Sheets)			
UNIT	`-V		Introduction to CREO		9 hours	
Introdu	iction to C	REO Param	etric, features of CREO, concepts- modeling, parametri	c, associ	ative, feature	
based,	sketch enti	ities- inferen	ce lines, center lines, circle, arc, ellipse, rectangle, slots	s, polygo	n, etc, sketch	
tools- f	fillet, cham	ifer, offset, t	rim, extend, split, mirror, move, copy, rotate, scale, stre	tch etc. d	dimensioning	
(4 Shee	ets)					
Cours	se outcor	ne: Aft	er completion of this course students will be able to			
СО	I		c principles of engineering graphics to draw various	types o	f K ₁ , K ₂	

	Scales, Cycloidal and involutes curves.				
CO 2	Draw and develop the projections of points lines and planes.				
CO 3	Draw orthographic projection of solids and their sections and draw the lateral surfaces.				
CO 4	Apply CAD software to draw 2D and 3D drawing.	K ₂			
CO 5	Apply CREO software to draw 2D and 3D drawing.	K ₂ , K ₃

B. TECH FIRST YEAR						
		AME025	2	L T P 0 0 3	Credit 1.5	
		Engineer	ing Graphics & Solid Modelling			
	I		Suggested list of Experiment	I	I	
Sheet No.	Exp	periment	Name of Experiment			
	No.					
1.	1		To draw plain scale and diagonal scale.			
2.	1 To draw projection of points, lines and planes.					
3.	1		To draw orthographic projection of regular so	lids.		
	2		To draw section of regular solids.			
4.	1		To draw development of lateral surfaces of sin	nple solids.		
	2		To draw cycloidal or involute curve.			
5.	1		Initiating the Graphics Package; Setting the p	paper size, space	; setting the	
			limits, units; use of snap and grid commands in	n AutoCAD		
	1		To create 2D view of a center pin with given dimensions in AutoCAD.			
6.	2		To create 2D view of abase plate with given dimensions in AutoCAD.			
	3		To create 2D view of a bush with given dimens	ions in AutoCAD		
_	1		To create 3D view of a washer in AutoCAD.			
7.	2		To create 3D view of a guide pin in AutoCAD.			
	3		To create 3D view of a lock nut in AutoCAD.			
8.	1		To create drawings of given machine compone	nts in AutoCAD		
9.	1		To understand basic of CREO			
	2		To understand basic sketching in CREO			
10.	1	To understand basic par modelling in CREO using different options aid			otions aiding	
			constructions like extrude, hole, ribs, shell etc.			
11.	1		Introduction to CREO Parametric 'sketch featu	ares' (revolve, sv	veep, helical	
			sweep, sweep blend etc.			
12.	1		Introduction to CREO Parametric 'edit feature	es' (group, copy,	mirror tool)	
			and 'place features' (holes, shells and drafts).
