NOIDA INSTITUTE OF ENGINEERING & TECHNOLOGY, GREATER NOIDA (An Autonomous Institute)

B. TECH (IT)

* AICTE Guidelines in Model Curriculum:

A student will be eligible to get Under Graduate degree with Honours only, if he/she completes the additional MOOCs courses such as Coursera certifications, or any other online courses recommended by the Institute (Equivalent to 20 credits). During Complete B.Tech. Program Guidelines for credit calculations are as follows.

- 1. For 6 to 12 Hours =0.5 Credit
- 2. For 13 to 18 =1 Credit
- 3. For 19 to 24 =1.5 Credit
- 4. For 25 to 30 =2 Credit
- 5. For 31 to 35 =2.5 Credit
- 6. For 36 to 41 =3 Credit
- 7. For 42 to 47 = 3.5 Credit
- 8. For 48 and above =4 Credit

For registration to MOOCs Courses, the students shall follow Coursera registration details as per the assigned login and password by the Institute these courses may be cleared during the B. Tech degree program (as per the list provided). After successful completion of these MOOCs courses, the students shall provide their successful completion status/certificates to the Controller of Examination (COE) of the Institute through their coordinators/Mentors only.

The students shall be awarded Honours Degree as per following criterion.

- i. If he / she secures 7.50 as above CGPA.
- ii. Passed each subject of that degree program in the single attempt without any grace.
- iii. Successful completion of MOOCs based 20 credits.

| | B. TECH. SECOND YEAR | | | | |
|--|---|------------------|---------------|--|--|
| Course Code | AAS0301A | L T P | Credit | | |
| Course Title | Engineering Mathematics-III | 310 | 4 | | |
| Course objectiv | e: The objective of this course is to familiariz | the engineers | with concept | | |
| of function of | complex variables, Partial differential equa | ations & their | applications, | | |
| Numerical techr | niques for various mathematical tasks and nu | merical aptitude | e. It aims to | | |
| show case the | students with standard concepts and tools | from B. Tech t | to deal with | | |
| advanced level | of mathematics and applications that we | ould be essenti | al for their | | |
| disciplines. | | | | | |
| Pre-requisites: | Knowledge of Mathematics I and II of B. Tech | n or equivalent. | | | |
| | Course Contents / Syllabus | | | | |
| UNIT-1 | Complex Variable – Differentiation | | 8 Hours | | |
| Riemann equations (Cartesian and Polar form), Harmonic function, Method to find Analytic functions, Conformal mapping, Mobius transformation and their properties. | | | | | |
| UNIT-2 | Complex Variable – Integration | | 8 Hours | | |
| Complex integrals, Contour integrals, Cauchy- Goursat theorem, Cauchy integral formula, Taylor's series, Laurent's series, Liouvilles's theorem, Singularities, Classification of Singularities, zeros of analytic functions, Residues, Methods of finding residues, Cauchy Residue theorem, Evaluation of real integrals of the type $\int_0^{2\pi} f(\sin\theta, \cos\theta) d\theta$ and $\int_{-\infty}^{\infty} f(x) dx$. | | | | | |
| UNIT-3 | Partial Differential Equation and its Appli | cations | 8 Hours | | |
| Introduction of partial differential equations, Second order linear partial differential equations with constant coefficients. Classification of second order partial differential equations, Method of separation of variables for solving partial differential equations, Solution of one- and two-dimensional wave and heat conduction equations. | | | | | |
| UNIT-4 | Numerical Techniques | | 8 Hours | | |
| Error analysis, Zeroes of transcendental and polynomial equations using Bisection method, Regula-falsi method and Newton-Raphson method, Interpolation: Finite differences, Newton's forward and backward interpolation, Lagrange's and Newton's divided difference formula for unequal intervals. | | | | | |
| Solution of system of linear equations, Crout's method, Gauss- Seidel method. Numerical integration, Trapezoidal rule, Simpson's one third and three-eight rules, Solution of first order ordinary differential equations by fourth-order Runge- Kutta methods. | | | | | |

| UNIT-5 | Aptitude-III | 8 Hours |
|-----------------------|--|------------------------|
| Time & W | Vork, Pipe & Cistern, Time, Speed & Distance, Boat & Stream, Sitting Arrangen | nent, Clock & |
| Calendar. | | |
| Course o | utcome: After completion of the course, students will be able to | |
| CO 1 | Apply the working methods of complex functions for finding analytic functions. | K3 |
| CO 2 | Apply the concepts of complex functions for finding Taylor's series, Laurent's series and evaluation of definite integrals. | К3 |
| CO 3 | Apply the concept of partial differential equation to solve partial differential Equations and problems concerned with partial differential equations. | K4 |
| CO 4 | Apply the concept of numerical techniques to evaluate the zeroes of the Equation, concept of interpolation and numerical methods for various mathematical operations and tasks, such as integration, the solution of linear system of equations and the solution of differential equation. | К3 |
| CO 5 | Solve the problems of Time & Work, Pipe & Cistern, Time, Speed & Distance, Boat & Stream, Sitting Arrangement, Clock & Calendar. | K3 |

| Course Code | ACSE0306 | L | Т | Р | Credits |
|---------------------|---------------------|---|---|---|---------|
| Course Title | Discrete Structures | 3 | 0 | 0 | 3 |

Course objective:

The subject enhances one's ability to develop logical thinking and ability to problem solving. The objective of discrete structure is to enables students to formulate problems precisely, solve the problems, apply formal proofs techniques and explain their reasoning clearly.

Pre-requisites:

- 1. Basic Understanding of mathematics
- 2. Basic knowledge algebra.
- 3. Basic knowledge of mathematical notations

Course Contents / Syllabus

| Unit-I | Set Theory, Relation, Function | 8 Hours |
|------------|--|----------------|
| Set Theory | : Introduction to Sets and Elements, Types of sets, Venn Diagrams, Set Operation | ns, Multisets, |

Ordered pairs. Proofs of some general Identities on sets. **Relations:** Definition, Operations on relations, Pictorial Representatives of Relations, Properties of relations,

Composite Relations, Recursive definition of relation, Order of relations.

Functions: Definition, Classification of functions, Operations on functions, Growth of Functions.

Combinatorics: Introduction, basic counting Techniques, Pigeonhole Principle.

Recurrence Relation & Generating function: Recursive definition of functions, Recursive Algorithms, Method of solving Recurrences.

Proof techniques: Mathematical Induction, Proof by Contradiction, Proof by Cases, Direct Proof.

| Unit-II | Algebraic Structures | 8 Hours | | |
|---|----------------------|---------|--|--|
| Algebraic Structures: Definition, Operation, Groups, Subgroups and order, Cyclic Groups, Cosets, Lagrange's | | | | |
| theorem, Normal Subgroups, Permutation and Symmetric Groups, Group Homomorphisms, Rings, Internal | | | | |
| Domains, ar | Domains, and Fields. | | | |

Unit-III Lattices and Boolean Algebra

Ordered set, Posets, Hasse Diagram of partially ordered set, Lattices: Introduction, Isomorphic Ordered set, Well ordered set, Properties of Lattices, Bounded and Complemented Lattices, Distributive Lattices.

Boolean Algebra: Introduction, Axioms and Theorems of Boolean Algebra, Algebraic Manipulation of Boolean Expressions, Simplification of Boolean Functions.

Unit-IV | **Propositional Logic**

Propositional Logic: Introduction, Propositions and Compound Statements, Basic Logical Operations, Wellformed formula, Truth Tables, Tautology, Satisfiability, Contradiction, Algebra of Proposition, Theory of Inference.

Predicate Logic: First order predicate, Well-formed formula of Predicate, Quantifiers, Inference Theory of Predicate Logic.

| Unit-V | Tree and Graph |
|--------|----------------|
|--------|----------------|

8 Hours

8 Hours

8 Hours

Trees: Definition, Binary tree, Complete and Extended Binary Trees, Binary Tree Traversal, Binary Search Tree.

Graphs: Definition and terminology, Representation of Graphs, Various types of Graphs, Connectivity, Isomorphism and Homeomorphism of Graphs, Euler and Hamiltonian Paths, Graph Coloring

Course outcome: After completion of this course students will be able to:

| CO1 | Apply the basic principles of sets, relations & functions and mathematical induction in | К3 |
|-----|---|--------|
| | computer science & engineering related problems. | |
| CO2 | Understand the algebraic structures and its properties to solve complex problems. | K2 |
| CO3 | Describe lattices and its types and apply Boolean algebra to simplify digital circuit. | K2, K3 |
| CO4 | Infer the validity of statements and construct proofs using predicate logic formulas. | K3, K5 |
| CO5 | Design and use the non-linear data structure like tree and graphs to solve real world | K3, K6 |
| | problems. | |

| Stacks: Primitiv stack: Infix, Pref | e Stack operations: Push & Pop, Array and Linked Implementat ix, Postfix Expressions and their mutual conversion, Evaluation of | ion of Stack, Ap of postfix expres | oplication of sion. | | | | | |
| Recursion : Principles of recursion, Tail recursion, Removal of recursion, Problem solving using iteration and recursion with examples such as binary search, Fibonacci series, and Tower of Hanoi, Trade-offs between iteration and recursion. | | | | | | | | |
| Queues : Array and linked implementation of queues, Operations on Queue: Create, Insert, Delete, Full and Empty, Circular queues, Dequeue and Priority Queue. | | | | | | | | |
| UNIT-III | UNIT-IIILinked lists8 hours | | | | | | | |
| Advantages of linked list over array, Self-referential structure, Singly Linked List, Doubly Linked List, Circular Linked List. | | | | | | | | |
| Operations on a Linked List: Insertion, Deletion, Traversal, Reversal, Searching, Polynomial Representation | | | | | | | | |

and Addition of Polynomials.

Implementation of Stack and Queue using Linked lists.

| UNIT-IV | Trees | 8 hours |
|---------|-------|---------|
| | | |

Basic terminology used with Tree, Binary Trees, Binary Tree Representation: Array Representation and Pointer (Linked List) Representation, Binary Search Tree, Strictly Binary Tree, Complete Binary Tree, An Extended Binary Trees.

Tree Traversal algorithms: In-order, Pre-order and Post-order. Constructing Binary Tree from given Tree Traversal, Operation of Insertion, Deletion, Searching & Modification of data in Binary Search tree, Binary Heaps, Heap sort, Threaded Binary trees, Traversing Threaded Binary trees, AVL Tree, B-Tree & Binary Heaps, Heap sort.

| UNIT-V | Graphs and File Structure | 8 hours |
|--------|---------------------------|---------|
| | | 1 |

Graphs: Terminology used with Graph, Data Structure for Graph Representations: Adjacency matrices, Adjacency List.

Graph Traversal: Depth First Search and Breadth First Search. Connected Component, Spanning Trees, Minimum Cost Spanning Trees: Prim' s and Kruskal's algorithm. Transitive Closure and Shortest Path algorithms: Dijkstra Algorithm.

File Structure: Concepts of files, records and files, Sequential, Indexed and Random File Organization, Indexing structure for index files, hashing for direct files, Multi-Key file organization and Access Methods.

Course outcome: After completion of this course students will be able to:

| CO 1 | Describe the need of data structure and algorithms in problem solving and | K2, K4 | | | |
|---|--|---------|--|--|--|
| | analyze Time space trade-off. | | | | |
| CO 2 | Describe how arrays are represented in memory and how to use them for | K2, K6 | | | |
| | implementation of matrix operations, searching and sorting along with their | | | | |
| | computational efficiency. | | | | |
| CO 3 | Compare and contrast the advantages and disadvantages of linked lists over | K4, K6 | | | |
| | arrays and implement operations on different types of linked list. | | | | |
| CO 4 | Design, implement and evaluate the real-world applications using stacks, | K5, K6 | | | |
| | queues and non-linear data structures. | | | | |
| CO 5 | Identify and develop the alternative implementations of data structures with | K1, K3, | | | |
| | respect to its performance to solve a real-world problem. | K5, K6 | | | |

| B.TECH. SECOND YEAR | | | | | |
|---|---|----------|-------------|----------|---------|
| Course Code | ACSE0302 | L | T | Р | Credit |
| Course Title | Object Oriented Techniques using Java | 3 | 0 | 0 | 3 |
| Course objective: The objective of this course is to understand the object-oriented methodology and its techniques to design and develop conceptual models and demonstrate the standard concepts of object-oriented techniques modularity, I/O. and other standard language constructs. The basic objective of this course is to understand the fundamental concepts of object-oriented programming in Java language and also implement the Multithreading concepts, GUI based application and collection framework. | | | | | |
| Pre-requisites: Student must command line Knowledge of | know at least the basics of how to use a computer, and she shell. f basic programming concepts, as covered in 'Programmi Course Contents / Syllabus | nould be | e ab ic" | ble to s | tart a |
| UNIT-I | Introduction | | | | 8 Hours |
| Object Oriented Programming: Introduction and Features: Abstraction, Encapsulation, Polymorphism, and Inheritance. Modeling Concepts: Introduction, Class Diagram and Object Diagram. Control Statements: Decision Making, Looping and Branching, Argument Passing Mechanism: Command Line Argument. | | | | | |
| UNIT-II | Basics of Java Programming | | | | 8 Hours |
| Class and Object: Object Reference, Constructor, Abstract Class, Interface and its uses, Defining Methods, Use of "this" and "super" keyword, Garbage Collection and finalize () Method. Inheritance: Introduction and Types of Inheritance in Java, Constructors in Inheritance. Polymorphism: Introduction and Types, Overloading and Overriding. Lambda expression: Introduction and Working with Lambda Variables. Arrays: Introduction and its Types. UNIT. III Packages: Exception Handling and String Handling | | | | | |
| UNIT-III | Packages, Exception Handling and String Ha | ndling | g | | 8 Hours |

Packages: Introduction and Types, Access Protection in Packages, Import and Execution of Packages.

Exception Handling, Assertions and Localizations: Introduction and Types, Exceptions vs. Errors, Handling of Exception. Finally, Throws and Throw keyword, Multiple Catch Block, Nested Try and Finally Block, Tokenizer. Assertions and Localizations Concepts and its working.

String Handling: Introduction and Types, Operations, Immutable String, Method of String class, String Buffer and String Builder class.

| UNIT-IV | IT-IV Concurrency in Java and I/O Stream | | | | |
|--|--|---------|--|--|--|
| Threads : Introduction and Types, Creating Threads, Thread Life-Cycle, Thread Priorities, Daemon Thread, Runnable Class, Synchronizing Threads. | | | | | |
| I/O Stream: Introduction and Types, Common I/O Stream Operations, Interaction with I/O Streams Classes. | | | | | |
| Annotations: Introduction, Custom Annotations and Applying Annotations. | | | | | |
| UNIT-V | GUI Programming, Generics and Collections | 8 Hours | | | |

GUI Programming: Introduction and Types, Swing, AWT, Components and Containers, Layout Managers and User-Defined Layout and Event Handling.

Generics and Collections: Introduction, Using Method References, Using Wrapper Class, Using Lists, Sets, Maps and Queues, Working with Generics.

Course outcome: After completion of this course students will be able to:

| CO1 | Identify the concepts of object-oriented programming and relationships among them needed in modeling. | K2 | | |
|---|--|--------|--|--|
| CO2 | Demonstrate the Java programs using OOP principles and also implement the concepts of lambda expressions. | К3 | | |
| | Implement packages with different protection level resolving namespace collision | | | |
| CO3 | and evaluate the error handling concepts for uninterrupted execution of Java program. | K3, K5 | | |
| CO4 | Implement Concurrency control, I/O Streams and Annotations concepts by using Java program. | К3 | | |
| CO5 | Design and develop the GUI based application, Generics and Collections in Java programming language to solve the real-world problem. | K6 | | |

B. TECH. SECOND YEAR Course Code ACSE0305 LT Р Credit **Computer Organization & Architecture Course Title** 3 0 3 0

Course objective:

To understand the types of organizations, structures and functions of computer, design of arithmetic and logic unit and float point arithmetic. To understand the concepts of memory system, communication with I/O devices and interfaces.

Pre-requisites:

UNIT-III

- Basic knowledge of computer system.
- Logic gates and their operations.

Course Contents / Syllabus

UNIT-I 8 Hours Introduction

Computer Organization and Architecture, Functional units of digital system and their interconnections, buses, bus architecture, types of buses and bus arbitration and it's types. Register, bus and memory transfer. Process or organization, general registers organization, stack organization and addressing modes.

UNIT-II ALU Unit

Arithmetic and logic unit: Lookahead carryadder. Multiplication: Signed operand multiplication, Booth's algorithm and array multiplier. Division and logic operations. Floating point arithmetic operation, Arithmetic & logic unit design. IEEE Standard for Floating Point Numbers.

Control Unit

Control Unit: Instruction types, formats, instruction cycles and sub cycles (fetch and execute etc.), micro-operations, execution of a complete instruction. Program Control, Reduced Instruction Set Computer, Complex Instruction Set Computer, Pipelining. Hardwire and microprogrammed control, Concept of horizontal and vertical microprogramming, Flynn's classification.

UNIT-IV Memory Unit

Memory: Basic concept and hierarchy, semiconductor RAM memories, 2D & 2 1/2D memory organization. ROM memories. Cache memories: concept and design issues & performance, address mapping and replacement Auxiliary memories: magnetic disk, magnetic tape and optical disks Virtual memory: concept implementation, Memory Latency, Memory Bandwidth, Memory Seek Time.

| UNIT-V | Input/Output | 8 Hours | | | | | |
|--|---|---------------|--|--|--|--|--|
| Peripheral device | Peripheral devices, I/O interface, I/O ports, Interrupts: interrupt hardware, types of interrupts and | | | | | | |
| exceptions. Modes | s of Data Transfer: Programmed I/O, interrupt initiated I/O and Direct Me | emory Access, | | | | | |
| I/O channels and processors. Serial Communication: Synchronous & asynchronous communication. | | | | | | | |
| Course outcom | e: After completion of this course students will be able to: | | | | | | |
| CO 1 Und | erstand the basic structure and operation of a digital computer system. | K1. K2 | | | | | |

| CO 1 | Understand the basic structure and operation of a digital computer system. | K1, K2 |
|------|---|--------|
| CO 2 | Analyzethe design of arithmetic & logic unit and understand the fixed point | K1, K4 |
| | and floating-point arithmetic operations. | |
| CO 3 | Implement control unit techniques and the concept of Pipelining | K3 |
| CO 4 | Understand the hierarchical memory system, cache memories and virtual | K2 |
| | memory. | |

8 Hours

8Hours

8Hours

| CO 5 | Understand different ways of communicating with I/O devices and standard | K2 | | | | | | |

| 36. | Write a JAVA program to implement even and odd thread by using Thread class and Runnable interface. | | | |
| 37. | Write a JAVA program to synchronize the threads by using Synchronize statements and Synchronize block | | CO4 | |
| 38. | To demonstrate the concept of type annotations in JAVA programming | | CO4 | |
| 39. | To demonstrate the concept of user defined annotations in JAVA programming language. | - | CO5 | |
| 40. | Write a JAVA program to implement the concept of Generic and Collection classes. | - | CO5 | |
| Lab C | ourse Outcome: After completion of this course students will be able | to | | |
| CO1 | To understand how to design and implement basic data types, command and control statements | line arguments | K2 | |
| CO2 | To demonstrate the Java programs using OOP principles and also implement the concepts of lambda expressions and arrays. | | | |
| CO3 To demonstrate, understand and use of different exceptional handling mechanisms, assertions, localizations and string handling. | | | К3 | |
| CO4 | To solve the real time problems using multithreading and annotations co | ncept. | K3 | |
| CO5 | To design and develop collections and generic classes in JAVA program | ming language | K6 | |

| B. TECH. SECOND YEAR | | | | | | | |
|---|---|------------------------|------------------------|--------------------------|------------------------------------|--|--|
| Course Code | ANC0301 | L | Т | Р | Credit | | |
| Course Title | Cyber Security | 2 | 0 | 0 | 0 | | |
| Course objective: Achieve knowledge about Security of Information system and Risk factors and examine security threats and vulnerability in various scenarios, understand concept of cryptography and encryption technique to protect the data from cyber-attackand provide protection for software and hardware. | | | | | | | |
| Concept of network Comman | and operating system. ads of programming language. | | | | | | |
| | Course Contents / Syllabus | | | | | | |
| UNIT-I | Introduction | | | | 8 Hours | | |
| Introduction to Information Need for Information Secur Password and WI-FI Secu Management. | n Systems: Types of Information Systems, Development or rity, Threats to Information Systems, Information Assurance rity and social media and Windows Security, Security F | of Ir æ, G Risk | iform uidel Anal | ation ines f ysis, | Systems, for Secure and Risk | | |
| UNIT-II | Application Layer Security | | | | 8 Hours | | |
| Intrusion Detection, Horse,Bombs,Trapdoors,Sp Services Attack, Security Credit/Debit Cards. | Access Control, Security Threats -Viruses boofs, E-mail Viruses, Macro Viruses, Malicious Software ,Threats to E-Commerce: Electronic Payment System, | , e,Net e- | Woı work Casł | rms, and n, Iss | Trojan Denial of sues with | | |
| UNIT-III | Secure System Development | | | | 8 Hours | | |
| Application Development Downloadable Devices, Mo Assets, Access Control, CC | Security, Architecture & Design, Security Issues in Hard obile Protection, Security Threats involving in social media TV and Intrusion Detection Systems, Backup Security Mea | ware , Phy asure | : Da ysical s. | ta Sto Secu | orage and rity of IT | | |
| UNIT-IV | Cryptography And Network Security | | | | 8 Hours | | |
| Public key cryptography: Functions,Public Key Distr Symmetric key cryptograph hash algorithm(SHA-1). | RSA Public Key Crypto with implementation in Python ibution. ny: DES (Data Encryption Standard), AES (Advanced Encryption Standard) | ,Dig yptic | ital S | Signat | ture Hash 1), Secure | | |
| Real World Protocols: Basic Terminologies, VPN, Email Security Certificates, Transport Layer Security, TLS, IP security, DNS Security. | | | | | | | |
| UNIT-V | Security Policy | | | | 8 Hours | | |
| Policy design Task, WWW Policies, Email based Policies, Policy Revaluation Process-Corporate Policies- Sample Security Policies, Publishing and Notification Requirement of the updated and new Policies. Resent trends in security. | | | | | | | |
| Course outcome: At the end of course, the student will be able to | | | | | | | |
| CO 1 | Analyze the cyber security needs of an organization. | | | K4 | | | |
| CO 2 | Identify and examine software vulnerabilities and security solutions. | | | K1,K | 3 | | |

| <u> </u> | Community of IT Access consists (howberger and | W0 | | | | |
|---|--|--------------------------|--|--|--|--|
| 03 | Software) and performance indicators | K 2 | | | | |
| CO 4 | Measure the performance and encoding strategies of security systems. | K3, K5 | | | | |
| CO 5 | Understand and apply cyber security methods and policies to enhance current scenario security. | K2, K3 | | | | |

| B. TECH. SECOND YEAR | | | | | |
|--|--|--|---|--|--|
| Cour | se Code | ANC0302 L T P | Credits | | |
| Cour | se Title | Environmental Science200 | 0 | | |
| Cour | se objec | tive: | | | |
| 1 | To help the s | he students in realizing the inter-relationship between man and environment. and students in acquiring basic knowledge about environment. | | | |
| 2 | To develo | op the sense of awareness among the students about environment and its various pr | oblems. | | |
| 3 | To create | positive attitude about environment among the student. | | | |
| 4 | To devel evaluatio | op proper skill required for the fulfilment of the aims of environmental educat ns | ion and educational | | |
| 5 | To develo through s | op the capability of using skills to fulfil the required aims, to realise and solve env social, political, cultural and educational processes | ironmental problems | | |
| Pre-r | equisite | s: Basic knowledge of nature. | | | |
| | | Course Contents / Syllabus | | | |
| UNIT | Г-І В | Basic Principle of Ecology | 8 Hours | | |
| Definit ecosyst differen Phosph Basic c | ion, Scope tem. Food nt ecosyst torus and S concepts of | e and basic principles of ecology and environment. Ecosystem: Basic conce chains and food webs. Ecological pyramids, Energy flow in ecological system ems. Biogeochemical Cycles: Importance, gaseous and sedimentary cycles. Sulphur Cycles. sustainable development, SDGs, Ecosystem services, UN Decade for Ecorestorati | pts, components of s, Characteristics of Carbon, Nitrogen, on. | | |
| UNIT | Γ-ΙΙ Ν | atural Resources and Associated Problems | 8 Hours | | |
| Natural dams ar using m agricult Land re Non-Re Resourc | resources a nd their effe nineral resource, fertilize sources: Lan newable En ces: hydropo | and associated problems. Forest resources: Use and over-exploitation, deforestation. Time acts on forest and tribal people. Mineral resources: Use and exploitation, environmental ef- arces. Food resources: World food problems, changes caused by agriculture and over-grazer- pesticide problems, water logging, salinity. and as a resource, land degradation, man induced landslides. Equitable use of resources for s- mergy Resources: Fossil fuels and their reserves, Nuclear energy, types, uses and effec- power, Solar energy, geothermal, tidal and wind energy, Biomass energy, biogas and its adva | ber extraction, mining, fects of extracting and ing, effects of modern sustainable lifestyles. ts, Renewable Energy antages. | | |
| UNIT | Γ-III B | Biodiversity Succession and Non-Renewable Energy Resource | s 8 Hours | | |
| Biodiversity and their importance, Threats to biodiversity, major causes, extinction's, vulnerability of species to extinction, IUCN threat categories, Red data book. Strategies for biodiversity conservation, principles of biodiversity conservation in-situ and ex-situ conservation strategies Mega diversity zones and Hot spots, concepts, distribution and importance. Succession: Concepts of succession, Types of Succession, Trends in succession, Climax and stability. | | | | | |
| UNIT | Г-ІV Р | ollution and Solid Waste Management | 8 Hours | | |
| Air pollution: sources of air pollution, Primary and secondary air pollutants. Origin and effects of SOX, NOX, Cox, CFC, Hydrocarbon, control of air pollution. Water pollution: sources and types of water pollution, Effects of water pollution, Eutrophication, Soil pollution: Causes of soil pollution, Effects of soil pollution, Major sources of and effects of noise pollution on health, Radioactive and thermal pollution sources and their effects on surrounding environment. | | | | | |
| Solid wa | Solid waste disposal and its effects on surrounding environment, Climate change, global warming, acid rain, ozone layer depletion. | | | | |
| UNI | ľ-V R | Kole of Community and Environmental Protection Acts | 8 Hours | | |
| | | | | | |

Role of community, women and NGOs in environmental protection, Bioindicators and their role, Natural hazards, Chemical accidents and disasters risk management, Environmental Impact Assessment (EIA), Salient features of following Acts: a. Environmental Protection Act, 1986, Wildlife (Protection) Act, 1972.b. Water (Prevention and control of pollution) Act, 1974.c. Air (Prevention and control of pollution) Act, 1981. Forest (Conservation) Act, 1980.d. Wetlands (Conservation and Management) Rules, 2017; e. Chemical safety and Disaster Management law. F. District Environmental Action Plan. Climate action plans.

Course outcome: After completion of this course students will be able to

| CO 1 | Understand the basic principles of ecology and environment. Ecosystem: Basic concepts, | K2 |
|------|--|----|
| | components of ecosystem., food chains and food webs. Ecological pyramids | |
| CO 2 | Understand the different types of natural recourses like food, forest, minerals and energy and their | K2 |
| | conservation | |
| CO 3 | Understand the importance of biodiversity, Threats of biodiversity and different methods of | K2 |
| | biodiversity conservation. | |
| CO 4 | Understand the different types of pollution, pollutants, their sources, effects and their control | K3 |
| | methods | |
| CO 5 | Understand the basic concepts of sustainable development, Environmental Impact Assessment | K3 |
| | (EIA) and different acts related to environment | |

| | | B. TECH. SECOND YEAR | | | |
|-------------|--|---|---------------------------------------|------------------|--|
| Cours | se Code | AASL0401 | LTP | Credit | |
| Cours | se Title | Technical Communication | 2 1 0 | 3 | |
| Cours | se objectiv | e: | | | |
| 1 | To help the job, and suc | students develop communication and critical thinking skil ceeding in the diverse and ever-changing workplace of the | ls necessary for e twenty first ce | securing a ntury | |
| 2 | To enable st | tudents to communicate effectively in English at the work | place. | | |
| Pre-re | Pre-requisites: The student must have a good degree of control over simple grammatical forms and some complex grammatical forms of English language. The student should be able to speak English intelligibly. | | | | |
| | | Course Content / Syllabus | | | |
| UNIT | '-I | Introduction to Technical Communication and | d Reading | 4 Hours | |
| • • • | Fundamenta Role of tech Reading Co Critical read | Is of technical communication nical communication mprehension - central idea, tone, and intention ling strategies | | | |
| UNIT | '-II | Technical Writing 1 | | 5 Hours | |
| • • • | Characterist Business let Notices, age Job applicat | ics of technical writing; technical vocabulary, etymology ters /emails – types, format, style and language enda and minutes ion, CV and resume | | | |
| UNIT | '-III | Technical Writing 2 | | 5 Hours | |
| • • • | Technical re Structure of Technical Pr Technical/ S | eports – types & formats a report roposal - structure and types Scientific paper writing | | | |
| UNIT | '-IV | Public Speaking | | 5 Hours | |
| • • • | Components Seminar and Conducting/ Appearing f Mobile etiqu | s of effective speaking (emphasis on voice dynamics) l conference presentation / participating in meetings or a job interview uettes | | | |
| UNIT | '-V | Manuscript Preparation | | 5 Hours | |
| • • • | Short report Copy editing Developing Ethical writi | writing g and referencing writing style – Jargons, Abbreviations ing 2: At the end of the course the students will be able to Let | vels. | | |
| Cours | | • The the chu of the course the students will be able to be | v V10. | | |

| CO 1 | Comprehend the fundamental principles of technical communication with special reference to reading. | K2 |
|--|--|-----------|
| CO 2 | Write various kinds of professional correspondence. | K5 |
| CO 3 | Recognise and produce different kinds of technical documents. | K2 |
| CO 4 | Apply effective speaking skills to communicate at the workplace. | К3 |
| CO 5 | Demonstrate their understanding of various ethical concerns in written communication. | К3 |

|--|--|------------------|----------|--|--|
| Course Code | ACSE0403A | LTP | Credits | | |
| Course Title | Operating Systems | 300 | 3 | | |
| Course objecti | ve: | | | | |
| The objective of operating system computer system synchronization, s | The objective of the course is to provide an understanding of the basic modules and architecture of an operating system and the functions of the modules to manage, coordinate and control all the parts of the computer system. This course cover processor scheduling, deadlocks, memory management, process synchronization system call and file system management. | | | | |
| Pre-requisites: | | | | | |
| 1. Basic know | wledge of computer fundamentals, Data structure and Comput | ter organization | 1. | | |
| | Course Contents / Syllabus | | | | |
| UNIT-I | Fundamental Concepts of Operating System | | 8 Hours | | |
| Processing,Multip Distributed Syste System Boot, In Monolithic, Micr Windows, Unix a UNIT-II Scheduling Conce Control Block (I management, Typ Pre-emptive and I SJF, Pre-emptive Scheduling and M | Structure,EvolutionofOperatingSystems-BareMachine,SingleProcessing,BatchProcessing,Multiprogramming,Multitasking,Multithreaded,Interactive,Timesharing,RealTimeSystem,DistributedSystem,MultiprocessorSystems,MultithreadedSystems,SystemCalls,SystemPrograms andSystemBoot,InterruptHandling,OperatingSystemStructure-Simplestructure,LayeredStructure,Monolithic,MicrokernelandHybrid,SystemComponents,OperatingSystemServices,CaseStudies:Windows, Unix andLinux.UNIT-IIProcessManagement8 HoursSchedulingConcepts,PerformanceCriteria,ProcessIdentificationInformation,Threads and theirmanagement,Types ofScheduling:LongTermScheduling,MidTermScheduling,Pre-emptiveSJF,Pre-emptiveSJF,NonPre-emptivePriority,Pro-emptivePro-emptiveSuperating,MultilevelQueueScheduling andMultilevelFeedbackOueueScheduling,NonRobin,MultilevelQueue | | | | |
| UNIT-III | Deadlock and Concurrent Processing | | 8 Hours | | |
| Deadlock: System model, Deadlock characterization, Prevention, Avoidance and detection, Recovery from Deadlock, Principle of Concurrency, Process Synchronization, Producer / Consumer Problem, Mutual Exclusion, Critical Section Problem, Peterson's Solution, Lamport Bakery Solution, Semaphores, Test and Set Operation; Critical Section Problems and their solutions - Bound Buffer Problem, Reader-Writer Problem, Dining Philosopher Problem, Sleeping Barber Problem; Inter Process Communication Models and Schemes, Process Generation. | | | | | |
| UNIT-IV | Memory Management | | 8 Hours | | |
| Memory Management function, Address Binding Loading : Compile Time, Load Time and Execution Time, MMU, Types of Linking, Types of Loading, Swapping, Multiprogramming with Fixed Partitions, Multiprogramming with variable partitions, Memory Allocation: Allocation Strategies First Fit, Best Fit, and Worst Fit, Paging, Segmentation, Paged Segmentation, Virtual Memory Concepts, Demand Paging, Performance of Demand Paging, Page Replacement Algorithms: FIFO,LRU, Optimal and LFU, Belady's Anomaly, Thrashing, Cache Memory Organization, Locality of Reference. | | | | | |
| | I/O management and DISK Scheduning | | 0 110u1S | | |

I/O Devices, and I/O Subsystems, I/O Buffering, I/O Ports, Disk Storage: Seek Time, Rotational Latency, Data Transfer Time, Average Access Time and Controller Time,Disk Storage Strategies, Disk Scheduling:FCFS, SSTF, SCAN, C-SCAN, LOOK and C-LOOK. Directory and Directory Structure, File System: File concept, File Access Mechanism: - Sequential Access, Direct Access and Index Access methods, File Allocation Method: Contiguous, Linked and Indexed, Free Space Management: -Bit Vector, Linked List, Grouping and Counting File System Implementation Issues, File System Protection and Security, RAID.

| Course o | utcome: After completion of this course students will be able to: | | | |
|--------------------------------|--|--------|--|--|
| CO 1 | Understand the fundamentals of an operating systems, functions and their structure and functions. | K1, K2 | | |
| CO 2 | Implement concept of process management policies, CPU Scheduling and thread management. | K5 | | |
| CO 3 | Understand and implement the requirement of process synchronization and apply deadlock handling algorithms. | K2, K5 | | |
| CO 4 | Evaluate the memory management and its allocation policies. | K5 | | |
| CO 5 | Understand and analyze the I/O management and File systems | K2, K4 | | |

|---|--|-------------|---------------|--|--|
| Course Code | e ACSE0404 | LTP | Credits | | |
| Course Title | Theory of Automata and Formal Languages | 300 | 3 | | |
| Course obje | ctive: | | | | |
| To teach math | ematical foundations of computation including automata theory | y, provide | the design | | |
| concepts of abs | tract computation model of finite automata, push down automata | a and Turir | ng Machine | | |
| and familiarize | the notions of algorithm, decidability, complexity, and computabil | lity. | | | |
| Pre-requisit | es: | | | | |
| • Discrete | Mathematics | | | | |
| • Fundam | ental of Computer System | | | | |
| | Course Contents / Syllabus | | | | |
| UNIT-I | Basic Concepts of Formal Language and Automata | Theory | 8 Hours | | |
| Introduction to | Theory of Computation- Alphabet, Symbol, String, Formal I | Languages, | Grammar, | | |
| Derivation an | d Language generation by Grammar, Chomsky Hierarchy | y, Finite | Automata, | | |
| Deterministic | Finite Automaton (DFA)- Definition, Representation, Acceptab | oility of a | String and | | |
| Language, Non | -Deterministic Finite Automaton (NFA), Equivalence of DFA an | nd NFA, N | FA with $∈$ - | | |
| Transition, Equ | ivalence of NFA's with and without ∈-Transition, Finite Automat | ta with out | put- Moore | | |
| Machine, Mea | ly Machine, Equivalence of Moore and Mealy Machine, M | inimizatior | ı of Finite | | |
| Automata, Mył | ill-Nerode Theorem, Simulation of DFA and NFA. | | | | |
| UNIT-II | Regular Language and Finite Automata | | 8 Hours | | |
| Regular Expres | sions, Transition Graph, Kleen's Theorem, Finite Automata and | l Regular I | Expression- | | |
| Arden's theore | m, Algebraic Method Using Arden's Theorem, Regular Gramm | nars-Right | Linear and | | |
| Left Linear gr | ammars, Conversion of FA into Regular grammar and Regula | ar gramma | ır into FA, | | |
| Regular and No | on-Regular Languages- Closure properties of Regular Languages, | Pigeonhol | e Principle, | | |
| Pumping Lemn | ha, Application of Pumping Lemma. | | | | |
| Decidability- L | ecision properties, Finite Automata and Regular Languages, Sin | nulation of | Transition | | |
| Graph and Reg | ilar language. | | 0.77 | | |
| UNIT-III | Context Free Language and Grammar | | 8 Hours | | |
| Context Free C | Grammar (CFG)-Definition, Derivations, Languages, Derivation | Trees and | Ambiguity, | | |
| Simplification | of CFG, Normal Forms- Chomsky Normal Form (CNF), Greibach | Normal Fo | orm (GNF), | | |
| Pumping Lemma for CFL, Closure properties of CFL, Decision Properties of CFL | | | | | |
| UNIT-IV | Push Down Automata | | 8 Hours | | |
| Pushdown Automata- Definition, Representation, Instantaneous Description (ID), Acceptance by PDA, | | | | | |
| Nondeterministic Pushdown Automata (NPDA)- Definition, Moves, Pushdown Automata and Context | | | | | |
| Free Language, Pushdown Automata and Context Free Grammar, Two stack Pushdown Automata. | | | | | |
| UNIT-V | Turing Machine and Undecidability | | 8 Hours | | |
| Turing Machine Model, Representation of Turing Machines, Language Acceptability of Turing | | | | | |
| Machines, Techniques for Turing Machine Construction, Variations of Turing Machine, Turing | | | | | |
| Machine as Computer of Integer Functions, Universal Turing machine, Linear Bounded Automata, | | | | | |

| Church | 's Thesis, Recursive and Recursively Enumerable language, Closure Properties of Rec | cursive | | | |
|------------------------|--|---|--|--|--|
| and Re | cursively Enumerable Languages, Non-Recursively Enumerable and Non-Recursive Lang | uages, | | | |
| Undeci | dability, Halting Problem, Undecidability of Halting Problem, Post's Correspondence Pro | blem. | | | |
| Cours | Se outcome: After completion of this course students will be able to: | | | | |
| CO 1 | Design and Simplify automata for formal languages and transform non-deterministic | K6 | | | |
| 001 | finite outomate to deterministic finite outomate | ĸo | | | |
| 00.2 | | 17.2 | | | |
| CO 2 | Identify the equivalence between the regular expression and finite automata and apply | K3 | | | |
| | closure properties of formal languages to construct finite automata for complex | | | | |
| | problems. | | | | |
| CO 3 | Define grammar for context free languages and use pumping lemma to disprove a | K3 | | | |
| | formal language being context- free. | | | | |
| CO 4 | Design pushdown automata (PDA) for context free languages and Transform the PDA | K6 | | | |
| | to context free grammar and vice-versa. | | | | |
| CO 5 | Construct Turing Machine for recursive and recursive enumerable languages. Identify | K6 | | | |
| | the decidable and undecidable problems. | | | | |

| Introduction on commands. SQI Aggregate funct Triggers, Proced | SQL: Characteristics of SQL, advantage of SQL. SQL data type and lit coperators and their procedure. Tables, Views and indexes. Queri- tions. Insert, Update and Delete operations, Joins, Unions, Intersecti- ures in SQL/PL SQL. | erals. Typ es and su on, Minus | es of SQL b queries. s, Cursors, | |
| UNIT-III | Database Design-Normalization | | 8 Hours | |
| Normalization, Normal Form (NF), Functional Dependencies (FD), Closure of an attribute set and FD sets, Canonical Cover of FD Sets, Normal Forms based on Functional Dependencies (1 NF, 2 NF, 3 NF, BCNF), Multivalued Dependencies (MVDs) and 4NF, Join Dependencies (JDs) and 5NF and Domain Key Normal Formal (DKNF or 6NF), Inclusion Dependencies, Loss-Less Join Decompositions. | | | | |
| UNIT-IV | Transaction Processing and Recovery Concept | | 8 Hours | |
| Transaction system, Testing of serializability, Serializability of schedules, Conflict &View serializable schedule, Recoverability, Recovery from transaction failures, Log based recovery, Checkpoints, Deadlock handling. | | | | |
| stamping protocols for concurrency control, Validation-based protocol, Multiplegranularity, Multi version schemes, Recovery with concurrent transaction, Case study of Oracle. | | | | |
| Distributed Database: -Introduction Distributed Database, Centralized and Distributed System Database System. | | | | |
| UNIT-V | Introduction No-SQL with cloud Database | | 8 Hours | |

Definition of NoSQL, History of NoSQL and Different NoSQL products, Exploring Mongo DB, Interfacing and Interacting with NoSQL, NoSQL Storage Architecture, CRUD operations with MongoDB, Querying, Modifying and Managing NoSQL Data stores, Indexing and ordering datasets(MongoDB).

Cloud database: - Introduction of Cloud database, NoSQL with Cloud Database, Introduction to Real time Database.

| Course outco | me: After completion of this course students will be able to: | |
|--------------|--|--------|
| CO 1 | Analyze database used to solve real world and complex problem and design the | K4 |
| | ER, EER Model. | |
| CO 2 | Analyze and apply Structured Query Language (SQL) or Procedural Query | K4,K3 |
| | Language (PL/SQL) to solve the complex queries. Implement relational model, | |
| | integrity constraints. | |
| CO 3 | Design and implement database for storing, managing data efficiently by | K6 |
| | applying the Normalization process on the database. | |
| CO 4 | Synthesize the concepts of transaction management, concurrency control and | K5 |
| | recovery. | |
| CO 5 | Understand and implement the concepts of NOSQL with cloud database. | K2, K5 |
| | | |
| Text books: | | |

- 1) Korth, Silbertz, Sudarshan," Database System Concepts", Seventh Edition, McGraw Hill.
- 2) Elmasri, Navathe, "Fundamentals of Database Systems", Seventh Edition, Addision Wesley.
- 3) Ivan Bayross "SQL,PL/SQL The programming language Oracle, Forth Edition, BPB Publication.

| B. TECH. SECOND YEAR | | | | | | | | |
|---|---|---|---|------|---------|--|--|--|
| Course Code | ANC0401 | L | Т | Р | Credit | | | |
| Course Title | Cyber Security | 2 | 0 | 0 | 0 | | | |
| Course objective | : | | | | | | | |
| Achieve knowledge about Security of Information system and Risk factors and examine security threats and vulnerability in various scenarios, understand concept of cryptography and encryption technique to protect the data from cyber-attackand provide protection for software and hardware. | | | | | | | | |
| Pre-requisites: B | asics recognition in the domain of Computer Science. | | | | | | | |
| Concept of network and operating system. Commands of programming language. | | | | | | | | |
| | Course Contents / Syllabus | | | | | | | |
| UNIT-I | Introduction | | | | 8 Hours | | | |
| Need for Information Systems: Types of Information Systems, Development of Information Systems, Need for Information Security, Threats to Information Systems, Information Assurance, Guidelines for Secure Password and WI-FI Security and social media and Windows Security, Security Risk Analysis, and Risk Management. | | | | | | | | |
| UNIT-II | Application Layer Security | | | | 8 Hours | | | |
| Data Security Considerations-Backups, Archival Storage and Disposal of Data, Security Technology- Firewall, Intrusion Detection, Access Control, Security Threats -Viruses, Worms, Trojan Horse, Bombs, Trapdoors, Spoofs, E-mail Viruses, Macro Viruses, Malicious Software, Network and Denial of Services Attack, Security, Threats to E-Commerce: Electronic Payment System, e- Cash, Issues with Credit/Debit Cards. | | | | | | | | |
| UNIT-III | Secure System Development | | | | 8 Hours | | | |
| Application Development Security, Architecture & Design, Security Issues in Hardware: Data Storage and Downloadable Devices, Mobile Protection, Security Threats involving in social media, Physical Security of IT Assets, Access Control, CCTV and Intrusion Detection Systems, Backup Security Measures. | | | | | | | | |
| UNIT-IV | Cryptography And Network Security | | | | 8 Hours | | | |
| Public key cryptography: RSA Public Key Crypto with implementation in Python,Digital Signature Hash Functions,Public Key Distribution. Symmetric key cryptography: DES (Data Encryption Standard), AES (Advanced Encryption Standard), Secure hash algorithm(SHA-1). | | | | | | | | |
| Real World Protocols: Basic Terminologies, VPN, Email Security Certificates, Transport Layer Security, TLS, IP security, DNS Security. | | | | | | | | |
| UNIT-V | Security Policy | | | | 8 Hours | | | |
| Policy design Task, WWW Policies, Email based Policies, Policy Revaluation Process-Corporate Policies- Sample Security Policies, Publishing and Notification Requirement of the updated and new Policies. Resent trends in security. | | | | | | | | |
| Course outcome: At the end of course, the student will be able to | | | | | | | | |
| CO 1 | Analyze the cyber security needs of an organization. | | | K4 | | | | |
| CO 2 | Identify and examine software vulnerabilities and security solutions. | |] | K1,K | 3 | | | |

| | | 110 | | | | |
|---|---|-------------------------|--|--|--|--|
| CO 3 | and performance indicators | K 2 | | | | |
| CO 4 | Measure the performance and encoding strategies of security systems. | K3, K5 | | | | |
| CO 5 | Understand and apply cyber security methods and policies | K2, K3 | | | | |
| | to enhance current scenario security. | | | | | |
