# NOIDA INSTITUTE OF ENGINEERING AND TECHNOLOGY, GREATER NOIDA 

(An Autonomous Institute)

## Affiliated to Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh, Lucknow <br> B.Tech <br> FIRST YEAR (SEMESTER-II) THEORY EXAMINATION (2020-2021)

(Objective Type)

## Subject Code: AEC0201

Max. Mks. : 70
Subject: Basic Electrical and Electronics Engineering
Time : 70 Minutes

## General Instructions:

All questions are compulsory
Question No- 1 to 35 are objective type question carrying 2 marks each.

| Q.No | Question Content | Question Image | Category | Sub Category | Marks | Options Randomiz ation | Type | Difficulty | Correct | Option1 | Option2 | Option3 | Option4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Consider a circuit with two unequal resistances in parallel, then $\qquad$ |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Smart | potential difference across each is same | large current flows in large resistor | current is same in both | potential difference across each is same | smaller resistance has smaller conductance |
| 2 | Which of the following theorems is applicable for both linear and nonlinear circuits? |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Brilliant | None of these | Superposition | Thevenin's | Norton's | None of these |
| 3 | Find the total current through R3 in the given circuit. |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Brilliant | 1.8 mA | 7.3 mA | 5.5 mA | 12.8 mA | 1.8 mA |
| 4 | A sinusoidal voltage has peak to peak value of 100 V . The rms value is $\qquad$ V. |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Smart | 35.35 | 50 | 70.7 | 35.35 | 141.41 |
| 5 | Impedance of an AC circuit is 10\∠60o\ \Ω,then resistance in the circuit is __ \Ω. |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Brilliant | 5 | 5 | 8.66 | 10 | none of above |
| 6 | To transmit the same amount of power over fixed distance, three-phase circuit needs $\qquad$ weight of copper as compared to single-phase circuit. |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Genius | 3/4 times | 3 times | 3/4 times | 2 times | 0.5 times |
| 7 | How to reduce hysteresis loss in transformer? |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Smart | By using soft magnetic material | By using thin laminated strips | By using soft magnetic material | By using hard magnetic material | By using solid piece of magnetic material |
| 8 | A 1000/100 V Transformer is supplied by $220 \mathrm{~V}, 50 \mathrm{~Hz}$ AC. Output frequency will be $\qquad$ . |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Genius | 50 Hz | 0.5 Hz | 0.005 Hz | 500 Hz | 50 Hz |
| 9 | Which of the following is cheapest protection element used in electrical system? |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Brilliant | Fuse | Isolator | Fuse | Relay | Circuit Breaker |
| 10 | n-type and p-type semiconductor formed by doping of $\qquad$ impurity |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Smart | Pentavalent | Trivalent | Pentavalent | Trivalent and Pentavalent | None of these |
| 11 | Peak inverse voltage of center tapped full wave rectifier is $\qquad$ |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single <br> Choice | Smart | 2Vm | 2 Vm | Vm | Vm/2 | None of these |

Page 1 of 3

| Q.No | Question Content | Question Image | Category | Sub Category | Marks | Options <br> Randomiz ation | Type | Difficulty | Correct | Option1 | Option2 | Option3 | Option4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 12 | The LCD digital display that is based on |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Brilliant | Reflection of light | Radiation of light | Reflection of light | Emission of light | Transmission of light |
| 13 | The differentiator output $\mathrm{Vo}=$ $\qquad$ for a pure DC input. |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Brilliant | Zero | Ramp | Zero | Unpredictable | None of these |
| 14 | The input offset current is defined as |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Smart | IB1- IB2 | IB1 + IB2 | IB1- IB2 | IB1 x IB2 | None of these |
| 15 | Which of the following is the way in which an IoT device is associated with data? |  | Attempt all the questions | $15 \times 2=30$ | 2 |  | Single Choice | Smart | Cloud | Internet | Cloud | Automata | Network |
| 16 | Ideally the efficiency should be $\qquad$ \% |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single <br> Choice | Brilliant | 100 | VA | 0 | 100 | iron |
| 17 | The $\qquad$ loss remains constant, independent of load. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single <br> Choice | Brilliant | iron | VA | 0 | 100 | iron |
| 18 | Ideally the regulation should be $\qquad$ \% |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | 0 | VA | 0 | 100 | iron |
| 19 | A transformer power rating is always in terms of $\qquad$ . |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | VA | VA | 0 | 100 | iron |
| 20 | The $\qquad$ elements supply electrical energy to the network. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | Active | Bilateral | Active | Unilateral | Linear |
| 21 | The $\qquad$ \ elements always follow ohm's law. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | Linear | Bilateral | Active | Unilateral | Linear |
| 22 | Resistor, inductor and capacitor are $\qquad$ elements. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single <br> Choice | Brilliant | Bilateral | Bilateral | Active | Unilateral | Linear |
| 23 | The $\qquad$ \  elements conducts in one direction only. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | Unilateral | Bilateral | Active | Unilateral | Linear |
| 24 | Form factor for a sine wave is |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart | 1.11 | L or C | RMS | 1.11 | resistance |
| 25 | In R-L-C series resonant circuit magnitude of resonance frequency can be changed by changing the value of $\qquad$ . |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single <br> Choice | Smart | Lor C | Lor C | RMS | 1.11 | resistance |
| 26 | In an A.C. circuit power is dissipated in |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart | resistance | L or C | RMS | 1.11 | resistance |
| 27 | The voltage of domestic supply is 220 V . <br> This figure represents $\qquad$ |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart | RMS | L or C | RMS | 1.11 | resistance |
| 28 | Intrinsic semiconductors are doped with $\qquad$ Impurity for making n-type semiconductor |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | pentavalent | trivalent | pentavalent | absolute zero | 200C |
| 29 | At temperature close to $\qquad$ the conduction begins in semiconductors. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | 200C | trivalent | pentavalent | absolute zero | 200C |
| 30 | Intrinsic semiconductors are doped with $\qquad$ Impurity for making p-type semiconductor\  |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Brilliant | trivalent | trivalent | pentavalent | absolute zero | 200C |
| 31 | The intrinsic semiconductor acts like insulator at the $\qquad$ temperature. |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single <br> Choice | Brilliant | absolute zero | trivalent | pentavalent | absolute zero | 200C |
| 32 | For an ideal OP-AMP, voltage gain is |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart |  |  |  |  |  |
| 33 | For an inverting Amplifier, voltage gain is |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart |  |  |  |  |  |
| 34 | For a Voltage Follower, voltage gain is |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart |  |  |  |  |  |

| Q.No | Question Content | Question Image | Category | $\begin{aligned} & \text { Sub } \\ & \text { Category } \end{aligned}$ | Marks | Options Randomiz ation | Type | Difficulty | Correct | Option1 | Option2 | Option3 | Option4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 35 | For a non-inverting Amplifier, voltage gain is |  | Attempt All Questions | $4 \times 2=8$ | 2 |  | Single Choice | Smart |  |  |  |  |  |
